	Claudin 17 (CLDN17) (NM_012131) Human Tagged ORF Clone Lentiviral Particle – RC210920L3V
Gene Summary:	This gene encodes a member of the claudin family. Claudins are integral membrane protein

This gene encodes a member of the claudin family. Claudins are integral membrane proteins and components of tight junction strands. Tight junction strands serve as a physical barrier to prevent solutes and water from passing freely through the paracellular space between epithelial or endothelial cell sheets, and also play critical roles in maintaining cell polarity and signal transductions. This gene is intronless and is clustered with CLDN8 on chromosome 21q22.11. [provided by RefSeq, Jun 2010]
