

Product datasheet for **RC211266L3V**

CEBPD (NM_005195) Human Tagged ORF Clone Lentiviral Particle

Product data:

| | |
|---------------------------|--|
| Product Type: | Lentiviral Particles |
| Product Name: | CEBPD (NM_005195) Human Tagged ORF Clone Lentiviral Particle |
| Symbol: | CEBPD |
| Synonyms: | C/EBP-delta; CELF; CRP3; NF-IL6-beta |
| Mammalian Cell Selection: | Puromycin |
| Vector: | pLenti-C-Myc-DDK-P2A-Puro (PS100092) |
| Tag: | Myc-DDK |
| ACCN: | NM_005195 |
| ORF Size: | 807 bp |
| ORF Nucleotide Sequence: | The ORF insert of this clone is exactly the same as(RC211266). |
| OTI Disclaimer: | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. More info |
| OTI Annotation: | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene. |
| RefSeq: | NM_005195.2 |
| RefSeq Size: | 1295 bp |
| RefSeq ORF: | 810 bp |
| Locus ID: | 1052 |
| UniProt ID: | P49716 |
| Cytogenetics: | 8q11.21 |
| Domains: | BRLZ |
| Protein Families: | Druggable Genome, Transcription Factors |

MW: 28.3 kDa

Gene Summary: The protein encoded by this intronless gene is a bZIP transcription factor which can bind as a homodimer to certain DNA regulatory regions. It can also form heterodimers with the related protein CEBP-alpha. The encoded protein is important in the regulation of genes involved in immune and inflammatory responses, and may be involved in the regulation of genes associated with activation and/or differentiation of macrophages. The cytogenetic location of this locus has been reported as both 8p11 and 8q11. [provided by RefSeq, Sep 2010]
