# LI Cadherin (CDH17) (NM\_004063) Human Tagged ORF Clone Lentiviral Particle

**Product data:** 

**Product Type:** Lentiviral Particles

**Product Name:** LI Cadherin (CDH17) (NM\_004063) Human Tagged ORF Clone Lentiviral Particle

Symbol: LI Cadherin

Synonyms: CDH16; HPT-1; HPT1

Mammalian Cell

Selection:

Puromycin

**Vector:** pLenti-C-Myc-DDK-P2A-Puro (PS100092)

Tag: Myc-DDK
ACCN: NM 004063

ORF Size: 2496 bp

**ORF Nucleotide** 

The ORF insert of this clone is exactly the same as(RC211298).

OTI Disclaimer:

Sequence:

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

RefSeq: <u>NM 004063.2</u>

 RefSeq Size:
 3697 bp

 RefSeq ORF:
 2499 bp

 Locus ID:
 1015

 UniProt ID:
 Q12864

 Cytogenetics:
 8q22.1

**Protein Families:** Transmembrane

**MW:** 92.15 kDa

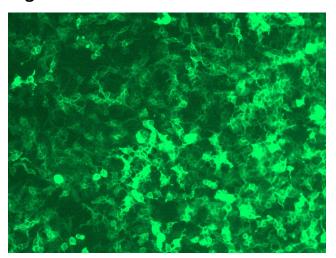

#### **Gene Summary:**

This gene is a member of the cadherin superfamily, genes encoding calcium-dependent, membrane-associated glycoproteins. The encoded protein is cadherin-like, consisting of an extracellular region, containing 7 cadherin domains, and a transmembrane region but lacking the conserved cytoplasmic domain. The protein is a component of the gastrointestinal tract and pancreatic ducts, acting as an intestinal proton-dependent peptide transporter in the first step in oral absorption of many medically important peptide-based drugs. The protein may also play a role in the morphological organization of liver and intestine. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Jan 2009]

# **Product images:**

[RC211298L3] was used to prepare Lentiviral particles using [TR30037] packaging kit. HEK293T cells were transduced with RC211298L3V particle to overexpress human CDH17-Myc-DDK fusion protein.
