CARD8 (NM_014959) Human Tagged Lenti ORF Clone

Product data:

Product Type: Expression Plasmids

Product Name: CARD8 (NM_014959) Human Tagged Lenti ORF Clone

Tag: Myc-DDK
Symbol: CARD8

Synonyms: CARDINAL; DACAR; DAKAR; NDPP; NDPP1; TUCAN

Mammalian Cell Puromycin

Selection:

Vector: pLenti-C-Myc-DDK-P2A-Puro (PS100092)

E. coli Selection: Chloramphenicol (34 ug/mL)

ORF Nucleotide The ORF insert of this clone is exactly the same as(RC211512).

Sequence:

Restriction Sites: Sgfl-Mlul

Cloning Scheme:

^{*} The last codon before the Stop codon of the ORF.

ACCN: NM_014959

ORF Size: 1461 bp

CARD8 (NM_014959) Human Tagged Lenti ORF Clone - RC211512L3

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method: 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: <u>NM 014959.3</u>

 RefSeq Size:
 5059 bp

 RefSeq ORF:
 1464 bp

 Locus ID:
 22900

 UniProt ID:
 Q9Y2G2

Domains: CARD

Cytogenetics:

Protein Families: Druggable Genome

Protein Pathways: NOD-like receptor signaling pathway

19q13.33

MW: 55.11 kDa

Gene Summary: The protein encoded by this gene belongs to the caspase recruitment domain (CARD)-

containing family of proteins, which are involved in pathways leading to activation of caspases or nuclear factor kappa-B (NFKB). This protein may be a component of the inflammasome, a protein complex that plays a role in the activation of proinflammatory caspases. It is thought that this protein acts as an adaptor molecule that negatively regulates NFKB activation,

CASP1-dependent IL1B secretion, and apoptosis. Polymorphisms in this gene may be associated with a susceptibility to rheumatoid arthritis. Alternatively spliced transcript

variants have been described for this gene. [provided by RefSeq, May 2010]
