Product Type:	Expression Plasmids
Product Name:	ROBO1 (NM_133631) Human Tagged Lenti ORF Clone
Tag:	Myc-DDK
Symbol:	ROBO1
Synonyms:	DUTT1; SAX3
Mammalian Cell Selection:	None
Vector:	pLenti-C-Myc-DDK (PS100064)
E. coli Selection:	Chloramphenicol (34 ug/mL)
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(RC211961).
<b>Restriction Sites:</b>	Sgfl-Mlul
Cloning Scheme:	
	Cloning sites used for ORF Shuttling:
	Sgf I         ORF         Miu I            GCG ATC GCC         ATG // NNN         ACG CGT

The last could before the stop could of the

ACCN: ORF Size: NM\_133631 4845 bp

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

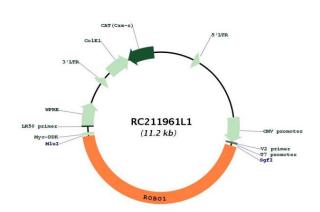

ORIGENE ROBO1 (NM_133631) Human Tagged Lenti ORF Clone – RC211961L1	
OTI Disclaimer:	Due to the inherent nature of this plasmid, standard methods to replicate additional amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a reduced cost. Please contact our customer care team at <u>custsupport@origene.com</u> or by calling 301.340.3188 option 3 for pricing and delivery.
	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Metho	<ul> <li>d: 1. Centrifuge at 5,000xg for 5min.</li> <li>2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.</li> <li>3. Close the tube and incubate for 10 minutes at room temperature.</li> <li>4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.</li> <li>5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.</li> </ul>
RefSeq:	<u>NM 133631.1</u>
RefSeq Size:	7475 bp
RefSeq ORF:	4821 bp
Locus ID:	6091
UniProt ID:	<u>Q9Y6N7</u>
Cytogenetics:	3p12.3
Domains:	ig, FN3
Protein Families:	Druggable Genome
Protein Pathways:	Axon guidance
MW:	175.7 kDa

### SORIGENE ROBO1 (NM\_133631) Human Tagged Lenti ORF Clone – RC211961L1

Gene Summary:Bilateral symmetric nervous systems have special midline structures that establish a partition<br/>between the two mirror image halves. Some axons project toward and across the midline in<br/>response to long-range chemoattractants emanating from the midline. The product of this<br/>gene is a member of the immunoglobulin gene superfamily and encodes an integral<br/>membrane protein that functions in axon guidance and neuronal precursor cell migration.<br/>This receptor is activated by SLIT-family proteins, resulting in a repulsive effect on glioma cell<br/>guidance in the developing brain. A related gene is located at an adjacent region on<br/>chromosome 3. Multiple transcript variants encoding different isoforms have been found for<br/>this gene. [provided by RefSeq, Mar 2009]
