Product datasheet for RC212006

PIGR (NM_002644) Human Tagged ORF Clone

Product data:

Product Type:	Expression Plasmids
Product Name:	PIGR (NM_002644) Human Tagged ORF Clone
Tag:	Myc-DDK
Symbol:	PIGR
Mammalian Cell Selection:	Neomycin
Vector:	pCMV6-Entry (PS100001)
E. coli Selection:	Kanamycin (25 ug/mL)

View online »

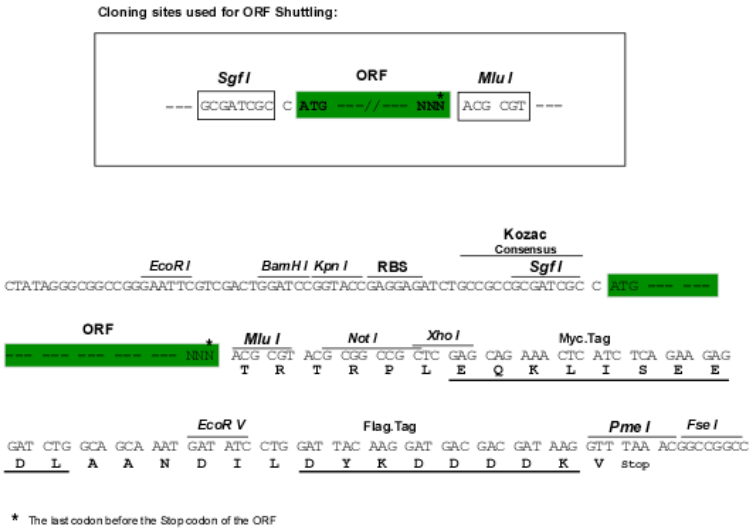
Chromatograms: https://cdn.origene.com/chromatograms/mk6165_a07.zip

Restriction Sites: SgfI-MluI

Cloning Scheme:



ACCN: NM_002644

ORF Size: 2292 bp

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.

Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Method:	1. Centrifuge at 5,000xg for 5min. 2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA. 3. Close the tube and incubate for 10 minutes at room temperature. 4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom. 5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.
Note:	Plasmids are not sterile. For experiments where strict sterility is required, filtration with 0.22um filter is required.
RefSeq:	NM_002644.4
RefSeq Size:	4266 bp
RefSeq ORF:	2295 bp
Locus ID:	5284
UniProt ID:	P01833
Cytogenetics:	1q32.1
Domains:	ig, IGv, IG
Protein Families:	Druggable Genome, Secreted Protein, Transmembrane
MW:	83.28 kDa
Gene Summary:	This gene is a member of the immunoglobulin superfamily. The encoded poly-Ig receptor binds polymeric immunoglobulin molecules at the basolateral surface of epithelial cells; the complex is then transported across the cell to be secreted at the apical surface. A significant association was found between immunoglobulin A nephropathy and several SNPs in this gene.[provided by RefSeq, Sep 2009]

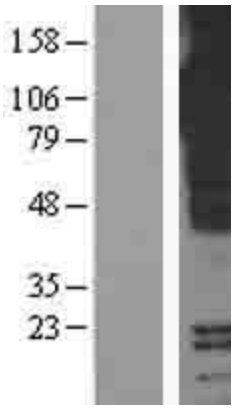
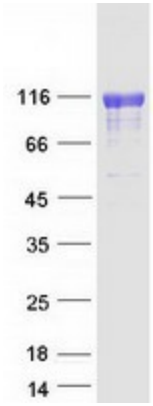
Circular map for RC212006



Western blot validation of overexpression lysate (Cat# [LY400939]) using anti-DDK antibody (Cat# [TA50011-100]). Left: Cell lysates from un-transfected HEK293T cells; Right: Cell lysates from HEK293T cells transfected with RC212006 using transfection reagent MegaTran 2.0 (Cat# [TT210002]).



Coomassie blue staining of purified PIGR protein (Cat# [TP312006]). The protein was produced from HEK293T cells transfected with PIGR cDNA clone (Cat# RC212006) using MegaTran 2.0 (Cat# [TT210002]).
