| Product Type:                | Expression Plasmids  |
|------------------------------|--|
| Product Name:                | SIRT4 (NM_012240) Human Tagged Lenti ORF Clone   |
| Tag:                         | mGFP   |
| Symbol:                      | SIRT4  |
| Synonyms:                    | SIR2L4   |
| Mammalian Cell<br>Selection: | Puromycin  |
| Vector:                      | pLenti-C-mGFP-P2A-Puro (PS100093)  |
| E. coli Selection:           | Chloramphenicol (34 ug/mL)   |
| ORF Nucleotide<br>Sequence:  | The ORF insert of this clone is exactly the same as(RC212226).                         |
| <b>Restriction Sites:</b>    | Sgfl-Mlul  |
| Cloning Scheme:              |  |
|                              | Cloning sites used for ORF Shuttling:  |
|                              | Sgf i         ORF         Miu i           GCG ATC GC         ATG// NNN         ACG CGT |

ACCN: ORF Size: NM\_012240 942 bp

| SIRT4 (NM_012240) Human Tagged Lenti ORF Clone – RC212226L4 |   |
|---|---|
| OTI Disclaimer:   | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>   |
| OTI Annotation:   | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.  |
| Components:   | The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).  |
| Reconstitution Method:                                      | <ol> <li>Centrifuge at 5,000xg for 5min.</li> <li>Carefully open the tube and add 100ul of sterile water to dissolve the DNA.</li> <li>Close the tube and incubate for 10 minutes at room temperature.</li> <li>Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.</li> <li>Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.</li> </ol>  |
| RefSeq:   | <u>NM 012240.1</u>  |
| RefSeq Size:  | 1174 bp   |
| RefSeq ORF:   | 945 bp  |
| Locus ID:   | 23409   |
| UniProt ID:   | <u>Q9Y6E7</u>   |
| Cytogenetics:   | 12q24.23-q24.31   |
| Domains:  | SIR2  |
| Protein Families:   | Druggable Genome, Transcription Factors   |
| MW:   | 35 kDa  |
| Gene Summary:   | This gene encodes a member of the sirtuin family of proteins, homologs to the yeast Sir2<br>protein. Members of the sirtuin family are characterized by a sirtuin core domain and<br>grouped into four classes. The functions of human sirtuins have not yet been determined;<br>however, yeast sirtuin proteins are known to regulate epigenetic gene silencing and suppress<br>recombination of rDNA. Studies suggest that the human sirtuins may function as intracellular<br>regulatory proteins with mono-ADP-ribosyltransferase activity. The protein encoded by this<br>gene is included in class IV of the sirtuin family. [provided by RefSeq, Jul 2008] |
