TBL1Y (NM 134259) Human Tagged ORF Clone Lentiviral Particle

Product data:

Product Type: Lentiviral Particles

Product Name: TBL1Y (NM_134259) Human Tagged ORF Clone Lentiviral Particle

Symbol:

DFNY2: TBL1 Synonyms:

Mammalian Cell

Selection:

ACCN:

None

Vector: pLenti-C-Myc-DDK (PS100064)

Tag: Myc-DDK NM 134259

ORF Size: 1566 bp

ORF Nucleotide

The ORF insert of this clone is exactly the same as(RC212240).

OTI Disclaimer:

Sequence:

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

RefSeq: NM 134259.1, NP 599021.1

RefSeq Size: 2312 bp RefSeq ORF: 1569 bp Locus ID: 90665 **UniProt ID:** Q9BQ87 Cytogenetics: Yp11.2

Domains: WD40, LisH

Protein Families: Transcription Factors

TBL1Y (NM_134259) Human Tagged ORF Clone Lentiviral Particle - RC212240L1V

Protein Pathways: Wnt signaling pathway

MW: 56.7 kDa

Gene Summary: The protein encoded by this gene has sequence similarity with members of the WD40 repeat-

containing protein family. The WD40 group is a large family of proteins, which appear to have

a regulatory function. It is believed that the WD40 repeats mediate protein-protein

interactions and members of the family are involved in signal transduction, RNA processing, gene regulation, vesicular trafficking, cytoskeletal assembly and may play a role in the control of cytotypic differentiation. This gene is highly similar to TBL1X gene in nucleotide sequence and protein sequence, but the TBL1X gene is located on chromosome X and this gene is on chromosome Y. This gene has three alternatively spliced transcript variants encoding the

same protein. [provided by RefSeq, Jul 2008]
