## ABL2 (NM 007314) Human Tagged ORF Clone Lentiviral Particle

### **Product data:**

**Product Type:** Lentiviral Particles

**Product Name:** ABL2 (NM\_007314) Human Tagged ORF Clone Lentiviral Particle

Symbol: ABL2

ABLL: ARG Synonyms: **Mammalian Cell** 

Selection:

Puromycin

Vector: pLenti-C-Myc-DDK-P2A-Puro (PS100092)

Tag: Myc-DDK NM 007314 ACCN: **ORF Size:** 3546 bp

**ORF Nucleotide** 

The ORF insert of this clone is exactly the same as(RC213232).

Sequence:

The molecular sequence of this clone aligns with the gene accession number as a point of OTI Disclaimer: reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

RefSeq: NM 007314.1

RefSeq Size: 3849 bp RefSeq ORF: 3549 bp

Locus ID: 27

**UniProt ID:** P42684 Cytogenetics: 1q25.2

**Domains:** pkinase, SH2, TyrKc, SH3, S\_TKc

**Protein Families:** Druggable Genome, Protein Kinase

### ABL2 (NM\_007314) Human Tagged ORF Clone Lentiviral Particle - RC213232L3V

**Protein Pathways:** ErbB signaling pathway, Viral myocarditis

MW: 128.2 kDa

**Gene Summary:** This gene encodes a member of the Abelson family of nonreceptor tyrosine protein kinases.

The protein is highly similar to the c-abl oncogene 1 protein, including the tyrosine kinase, SH2 and SH3 domains, and it plays a role in cytoskeletal rearrangements through its C-terminal F-actin- and microtubule-binding sequences. This gene is expressed in both normal and tumor cells, and is involved in translocation with the ets variant 6 gene in leukemia. Multiple alternatively spliced transcript variants encoding different protein isoforms have

been found for this gene. [provided by RefSeq, Nov 2009]
