

## **Product datasheet for RC213270**

### RNF128 (NM\_024539) Human Tagged ORF Clone

#### **Product data:**

**Product Type:** Expression Plasmids

**Product Name:** RNF128 (NM\_024539) Human Tagged ORF Clone

Tag:Myc-DDKSymbol:RNF128Synonyms:GRAIL

Mammalian Cell Neomycin

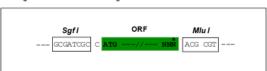

Selection:

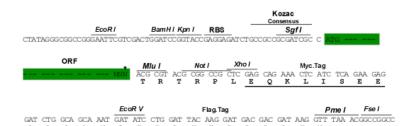

Vector:pCMV6-Entry (PS100001)E. coli Selection:Kanamycin (25 ug/mL)

Restriction Sites: Sgfl-Mlul

**Cloning Scheme:** 

Cloning sites used for ORF Shuttling:

<sup>\*</sup> The last codon before the Stop codon of the ORF

**ACCN:** NM\_024539

ORF Size: 1206 bp

**OriGene Technologies, Inc.** 9620 Medical Center Drive, Ste 200

#### RNF128 (NM\_024539) Human Tagged ORF Clone - RC213270

**OTI Disclaimer:** The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**Components:** The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

**Reconstitution Method:** 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

**RefSeq:** <u>NM 024539.3</u>, <u>NP 078815.3</u>

RefSeq Size: 2688 bp
RefSeq ORF: 1209 bp
Locus ID: 79589
UniProt ID: Q8TEB7
Cytogenetics: Xq22.3

Domains: RING, PA

**Protein Families:** Transmembrane

**MW:** 44.6 kDa

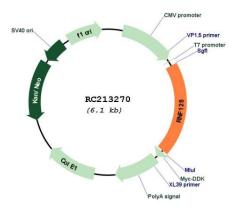

**Gene Summary:** The protein encoded by this gene is a type I transmembrane protein that localizes to the

endocytic pathway. This protein contains a RING zinc-finger motif and has been shown to possess E3 ubiquitin ligase activity. Expression of this gene in retrovirally transduced T cell hybridoma significantly inhibits activation-induced IL2 and IL4 cytokine production. Induced expression of this gene was observed in anergic CD4(+) T cells, which suggested a role in the induction of anergic phenotype. Alternatively spliced transcript variants encoding distinct

isoforms have been reported. [provided by RefSeq, Jul 2008]
