IHH (NM_002181) Human Tagged ORF Clone Lentiviral Particle

Product data:

Product Type: Lentiviral Particles

Product Name: IHH (NM_002181) Human Tagged ORF Clone Lentiviral Particle

Symbol: IHH

Synonyms: BDA1; HHG2

Mammalian Cell None

Selection:

Vector: pLenti-C-Myc-DDK (PS100064)

 Tag:
 Myc-DDK

 ACCN:
 NM_002181

 ORF Size:
 1233 bp

ORF Nucleotide

Sequence:

The ORF insert of this clone is exactly the same as(RC213565).

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through

naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

RefSeg: NM 002181.1

 RefSeq Size:
 1236 bp

 RefSeq ORF:
 1236 bp

 Locus ID:
 3549

 UniProt ID:
 Q14623

Cytogenetics: 2q35

Protein Families: Druggable Genome, ES Cell Differentiation/IPS, Protease, Transmembrane

Protein Pathways: Hedgehog signaling pathway

ORIGENE

MW: 45.25 kDa

Gene Summary:

This gene encodes a member of the hedgehog family of proteins. The encoded preproprotein is proteolytically processed to generate multiple protein products, including an N-terminal fragment that is involved in signaling. Hedgehog family proteins are essential secreted signaling molecules that regulate a variety of developmental processes including growth, patterning and morphogenesis. The protein encoded by this gene specifically plays a role in bone growth and differentiation. Mutations in this gene are the cause of brachydactyly type A1, which is characterized by shortening or malformation of the fingers and toes. Mutations in this gene are also the cause of acrocapitofemoral dysplasia. [provided by RefSeq, Nov 2015]
