| OTI Disclaimer:              | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u> |
| OTI Annotation:              | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.  |

| Gene Summary: | The enzyme encoded by this gene is classified as a thiolesterase and is responsible for the<br>hydrolysis of S-lactoyl-glutathione to reduced glutathione and D-lactate. Three transcript<br>variants encoding different isoforms have been found for this gene. [provided by RefSeq, Oct<br>2013] |
