OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

## Bombesin Receptor 3 (BRS3) (NM\_001727) Human Tagged ORF Clone Lentiviral Particle – RC213923L2V

MW: 44.2 kDa

**Gene Summary:** The protein encoded by this gene is a G protein-coupled membrane receptor that binds

bombesin-like peptides. This binding results in activation of a phosphatidylinositol-calcium second messenger system, with physiological effects including regulation of metabolic rate,

glucose metabolism, and hypertension. [provided by RefSeq, Sep 2011]
