	SETD3 (NM_032233) Human Tagged ORF Clone Lentiviral Particle – RC214566L1V
Gene Summary:	Protein-histidine N-methyltransferase that specifically mediates methylation of actin at 'His-
	73' (PubMed:30526847, PubMed:30626964, PubMed:30785395). Histidine methylation of

73' (PubMed:30526847, PubMed:30626964, PubMed:30785395). Histidine methylation of actin is required for smooth muscle contraction of the laboring uterus during delivery (PubMed:30626964). Does not have protein-lysine N-methyltransferase activity and probably only catalyzes histidine methylation of actin (PubMed:30626964, PubMed:30785395). [UniProtKB/Swiss-Prot Function]
