

# Product datasheet for RC214639L1

### MALT1 (NM\_006785) Human Tagged Lenti ORF Clone

### **Product data:**

#### OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

Product Type:	Expression Plasmids
Product Name:	MALT1 (NM_006785) Human Tagged Lenti ORF Clone
Tag:	Myc-DDK
Symbol:	MALT1
Synonyms:	IMD12; MLT; MLT1; PCASP1
Mammalian Cell Selection:	None
Vector:	pLenti-C-Myc-DDK (PS100064)
E. coli Selection:	Chloramphenicol (34 ug/mL)
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(RC214639).
<b>Restriction Sites:</b>	Sgfl-Mlul
Cloning Scheme:	
	Cloning sites used for ORF Shuttling:
	Sgf I         ORF         Mlu I            GCG ATC GC         ATG // NNÑ         ACG CGT

 $\begin{tabular}{c} \hline & Kozak\\ \hline$ 

\* The last codon before the Stop codon of the ORF.

ACCN: ORF Size: NM\_006785 2472 bp

	IALT1 (NM_006785) Human Tagged Lenti ORF Clone – RC214639L1
OTI Disclaimer:	Due to the inherent nature of this plasmid, standard methods to replicate additional amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a reduced cost. Please contact our customer care team at <u>custsupport@origene.com</u> or by calling 301.340.3188 option 3 for pricing and delivery.
	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution M	<ul> <li>chod: 1. Centrifuge at 5,000xg for 5min.</li> <li>2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.</li> <li>3. Close the tube and incubate for 10 minutes at room temperature.</li> <li>4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.</li> <li>5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.</li> </ul>
RefSeq:	<u>NM 006785.2</u>
RefSeq Size:	5029 bp
RefSeq ORF:	2475 bp
Locus ID:	10892
UniProt ID:	Q9UDY8
Cytogenetics:	18q21.32
Domains:	DEATH, ig, IGc2, IG
Protein Families:	Druggable Genome, Protease
Protein Pathway	B cell receptor signaling pathway, T cell receptor signaling pathway
MW:	92.1 kDa

### Serigene MALT1 (NM\_006785) Human Tagged Lenti ORF Clone – RC214639L1

Gene Summary:This gene encodes a caspase-like protease that plays a role in BCL10-induced activation of<br/>NF-kappaB. The protein is a component of the CARMA1-BCL10-MALT1 (CBM) signalosome<br/>that triggers NF-kappaB signaling and lymphoctye activation following antigen-receptor<br/>stimulation. Mutations in this gene result in immunodeficiency 12 (IMD12). This gene has<br/>been found to be recurrently rearranged in chromosomal translocations with other genes in<br/>mucosa-associated lymphoid tissue lymphomas, including a t(11;18)(q21;q21) translocation<br/>with the baculoviral IAP repeat-containing protein 3 (also known as apoptosis inhibitor 2)<br/>locus [BIRC3(API2)-MALT1], and a t(14;18)(q32;q21) translocation with the immunoglobulin<br/>heavy chain locus (IGH-MALT1). Alternatively spliced transcript variants have been described<br/>for this gene. [provided by RefSeq, May 2018]
