

Product datasheet for RC214659L1

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

OriGene Technologies, Inc.

NCALD (NM_032041) Human Tagged Lenti ORF Clone

Product data:

Product Type: Expression Plasmids

Product Name: NCALD (NM_032041) Human Tagged Lenti ORF Clone

Tag: Myc-DDK
Symbol: NCALD

Mammalian Cell

Selection:

None

Vector:pLenti-C-Myc-DDK (PS100064)E. coli Selection:Chloramphenicol (34 ug/mL)

ORF Nucleotide

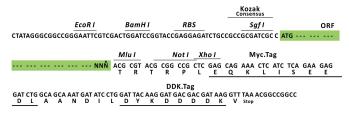

The ORF insert of this clone is exactly the same as(RC214659).

Sequence:

Restriction Sites: Sgfl-Mlul

Cloning Scheme:

^{*} The last codon before the Stop codon of the ORF.

ACCN: NM_032041

ORF Size: 579 bp

NCALD (NM_032041) Human Tagged Lenti ORF Clone - RC214659L1

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method: 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: <u>NM 032041.1</u>

 RefSeq Size:
 3735 bp

 RefSeq ORF:
 582 bp

 Locus ID:
 83988

 UniProt ID:
 P61601

 Cytogenetics:
 8q22.3

Domains: EFh

MW: 22.3 kDa

Gene Summary: This gene encodes a member of the neuronal calcium sensor (NCS) family of calcium-binding

proteins. The protein contains an N-terminal myristoylation signal and four EF-hand calcium $\,$

binding loops. The protein is cytosolic at resting calcium levels; however, elevated

intracellular calcium levels induce a conformational change that exposes the myristoyl group,

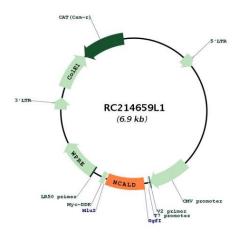

resulting in protein association with membranes and partial co-localization with the

perinuclear trans-golgi network. The protein is thought to be a regulator of G protein-coupled receptor signal transduction. Several alternatively spliced variants of this gene have been determined, all of which encode the same protein; additional variants may exist but their

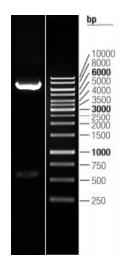

biological validity has not been determined. [provided by RefSeq, Jul 2008]
