## p95 NBS1 (NBN) (NM\_002485) Human Tagged Lenti ORF Clone - RC214682L3

**OTI Disclaimer:** The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**Components:** The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

**Reconstitution Method:** 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

**RefSeq:** <u>NM 002485.4</u>

 RefSeq Size:
 4639 bp

 RefSeq ORF:
 2265 bp

 Locus ID:
 4683

 UniProt ID:
 060934

Cytogenetics: 8q21.3

Domains: FHA

**Protein Families:** Druggable Genome

**Protein Pathways:** Homologous recombination

MW: 84.8 kDa

**Gene Summary:** Mutations in this gene are associated with Nijmegen breakage syndrome, an autosomal

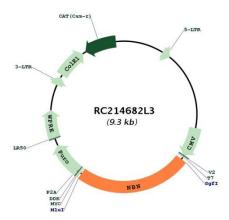

recessive chromosomal instability syndrome characterized by microcephaly, growth

retardation, immunodeficiency, and cancer predisposition. The encoded protein is a member of the MRE11/RAD50 double-strand break repair complex which consists of 5 proteins. This gene product is thought to be involved in DNA double-strand break repair and DNA damage-

induced checkpoint activation. [provided by RefSeq, Jul 2008]
