Product datasheet for RC214735L4

PPAR delta (PPARD) (NM_006238) Human Tagged Lenti ORF Clone

Product data:

| Product Type: | Expression Plasmids |
|------------------------------|--|
| Product Name: | PPAR delta (PPARD) (NM_006238) Human Tagged Lenti ORF Clone |
| Tag: | mGFP |
| Symbol: | PPAR delta |
| Synonyms: | FAAR; NR1C2; NUC1; NUCI; NUCI; PPARB |
| Mammalian Cell Selection: | Puromycin |
| Vector: | pLenti-C-mGFP-P2A-Puro (PS100093) |
| E. coli Selection: | Chloramphenicol (34 ug/mL) |
| ORF Nucleotide Sequence: | The ORF insert of this clone is exactly the same as(RC214735). |
| Restriction Sites: | Sgfl-Mlul |
| Cloning Scheme: | |
| | Cloning sites used for ORF Shuttling: |
| | Sgf1 ORF Mlu I GCG ATC GC/c ATG// NNN ACG CGT |

ACCN: ORF Size: NM_006238 1323 bp

| | PPAR delta (PPARD) (NM_006238) Human Tagged Lenti ORF Clone – RC214735L4 |
|-------------------|--|
| OTI Disclaimer: | Due to the inherent nature of this plasmid, standard methods to replicate additional amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a reduced cost. Please contact our customer care team at <u>custsupport@origene.com</u> or by calling 301.340.3188 option 3 for pricing and delivery. |
| | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u> |
| OTI Annotation: | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene. |
| Components: | The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water). |
| Reconstitution Me | thod: 1. Centrifuge at 5,000xg for 5min. 2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA. 3. Close the tube and incubate for 10 minutes at room temperature. 4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom. 5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C. |
| RefSeq: | <u>NM 006238.2</u> |
| RefSeq Size: | 3328 bp |
| RefSeq ORF: | 1326 bp |
| Locus ID: | 5467 |
| UniProt ID: | <u>Q03181</u> |
| Cytogenetics: | 6p21.31 |
| Domains: | HOLI, zf-C4 |
| Protein Families: | Druggable Genome, Nuclear Hormone Receptor, Transcription Factors |
| Protein Pathways: | Acute myeloid leukemia, Pathways in cancer, PPAR signaling pathway, Wnt signaling pathway |
| MW: | 49.7 kDa |
| | |

Serigene PPAR delta (PPARD) (NM_006238) Human Tagged Lenti ORF Clone – RC214735L4

Gene Summary:This gene encodes a member of the peroxisome proliferator-activated receptor (PPAR) family.
The encoded protein is thought to function as an integrator of transcriptional repression and
nuclear receptor signaling. It may inhibit the ligand-induced transcriptional activity of
peroxisome proliferator activated receptors alpha and gamma, though evidence for this effect
is inconsistent. Expression of this gene in colorectal cancer cells may be variable but is
typically relatively low. Knockout studies in mice suggested a role for this protein in
myelination of the corpus callosum, lipid metabolism, differentiation, and epidermal cell
proliferation. Alternative splicing results in multiple transcript variants encoding distinct
protein isoforms. [provided by RefSeq, Aug 2017]
