Product datasheet for RC214959

Desmocollin 3 (DSC3) (NM_024423) Human Tagged ORF Clone

Product data:

Product Type:	Expression Plasmids
Product Name:	Desmocollin 3 (DSC3) (NM_024423) Human Tagged ORF Clone
Tag:	Myc-DDK
Symbol:	Desmocollin 3
Synonyms:	CDHF3; DSC; DSC1; DSC2; DSC4; HT-CP
Mammalian Cell Selection:	Neomycin
Vector:	pCMV6-Entry (PS100001)
E. coli Selection:	Kanamycin (25 ug/mL)
Restriction Sites:	Sgfl-Mlul
Cloning Scheme:	Cloning sites used for ORF Shuttling:

ACCN: ORF Size:

NM_024423

2517 bp

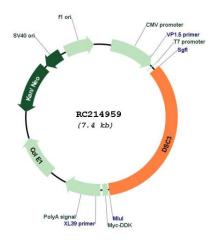

Desmocollin 3 (DSC3) (NM_024423) Human Tagged ORF Clone – RC214959	
OTI Disclaimer:	Due to the inherent nature of this plasmid, standard methods to replicate additional amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a reduced cost. Please contact our customer care team at <u>custsupport@origene.com</u> or by calling 301.340.3188 option 3 for pricing and delivery.
	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Metho	 d: 1. Centrifuge at 5,000xg for 5min. 2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA. 3. Close the tube and incubate for 10 minutes at room temperature. 4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom. 5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.
Note:	Plasmids are not sterile. For experiments where strict sterility is required, filtration with 0.22um filter is required.
RefSeq:	<u>NM 024423.1, NP 077741.1</u>
RefSeq Size:	5920 bp
RefSeq ORF:	2520 bp
Locus ID:	1825
UniProt ID:	<u>Q14574</u>
Cytogenetics:	18q12.1
Protein Families:	Transmembrane
MW:	90.5 kDa

Service Service Desmocollin 3 (DSC3) (NM_024423) Human Tagged ORF Clone – RC214959

Gene Summary:The protein encoded by this gene is a calcium-dependent glycoprotein that is a member of
the desmocollin subfamily of the cadherin superfamily. These desmosomal family members,
along with the desmogleins, are found primarily in epithelial cells where they constitute the
adhesive proteins of the desmosome cell-cell junction and are required for cell adhesion and
desmosome formation. The desmosomal family members are arranged in two clusters on
chromosome 18, occupying less than 650 kb combined. Mutations in this gene are a cause of
hypotrichosis and recurrent skin vesicles disorder. The protein can act as an autoantigen in
pemphigus diseases, and it is also considered to be a biomarker for some cancers.
Alternative splicing of this gene results in multiple transcript variants. [provided by RefSeq,
Apr 2014]
