Complement C3 (C3) (NM 000064) Human Tagged ORF Clone Lentiviral Particle

Product data:

Product Type: Lentiviral Particles

Product Name: Complement C3 (C3) (NM 000064) Human Tagged ORF Clone Lentiviral Particle

Symbol: C3

Synonyms: AHUS5; ARMD9; ASP; C3a; C3b; CPAMD1; HEL-S-62p

Mammalian Cell

Selection:

Puromycin

Vector: pLenti-C-Myc-DDK-P2A-Puro (PS100092)

 Tag:
 Myc-DDK

 ACCN:
 NM_000064

ORF Size: 4989 bp

ORF Nucleotide

Sequence:

The ORF insert of this clone is exactly the same as(RC215069).

OTI Disclaimer:

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

RefSeg: NM 000064.1, NP 000055.1

 RefSeq Size:
 5067 bp

 RefSeq ORF:
 4992 bp

 Locus ID:
 718

 UniProt ID:
 P01024

 Cytogenetics:
 19p13.3

Domains: ANATO, NTR, A2M, A2M_N

Protein Families: Druggable Genome

Complement C3 (C3) (NM_000064) Human Tagged ORF Clone Lentiviral Particle - RC215069L3V

Protein Pathways: Complement and coagulation cascades, Systemic lupus erythematosus

MW: 187 kDa

Gene Summary: Complement component C3 plays a central role in the activation of complement system. Its

activation is required for both classical and alternative complement activation pathways. The encoded preproprotein is proteolytically processed to generate alpha and beta subunits that form the mature protein, which is then further processed to generate numerous peptide products. The C3a peptide, also known as the C3a anaphylatoxin, modulates inflammation and possesses antimicrobial activity. Mutations in this gene are associated with atypical hemolytic uremic syndrome and age-related macular degeneration in human patients.
