

Product datasheet for RC215203L1V

OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

ETS1 (NM_005238) Human Tagged ORF Clone Lentiviral Particle

Product data:

Product Type: Lentiviral Particles

Product Name: ETS1 (NM_005238) Human Tagged ORF Clone Lentiviral Particle

Symbol: ETS

Synonyms: c-ets-1; ETS-1; EWSR2; p54

Mammalian Cell

Selection:

None

Vector: pLenti-C-Myc-DDK (PS100064)

 Tag:
 Myc-DDK

 ACCN:
 NM_005238

ORF Size: 1323 bp

ORF Nucleotide

The ORF insert of this clone is exactly the same as(RC215203).

Sequence:

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

RefSeg: NM 005238.2

 RefSeq Size:
 5228 bp

 RefSeq ORF:
 1326 bp

 Locus ID:
 2113

 UniProt ID:
 P14921

 Cytogenetics:
 11q24.3

Domains: ETS, SAM_PNT

Protein Families: Druggable Genome, Transcription Factors

ETS1 (NM_005238) Human Tagged ORF Clone Lentiviral Particle - RC215203L1V

Protein Pathways: Dorso-ventral axis formation, Pathways in cancer, Renal cell carcinoma

MW: 50.2 kDa

Gene Summary: This gene encodes a member of the ETS family of transcription factors, which are defined by

the presence of a conserved ETS DNA-binding domain that recognizes the core consensus DNA sequence GGAA/T in target genes. These proteins function either as transcriptional activators or repressors of numerous genes, and are involved in stem cell development, cell senescence and death, and tumorigenesis. Alternatively spliced transcript variants encoding

different isoforms have been described for this gene.[provided by RefSeq, Jul 2011]
