Desmuslin (SYNM) (NM_145728) Human Tagged Lenti ORF Clone

Product data:

Product Type: Expression Plasmids

Product Name: Desmuslin (SYNM) (NM_145728) Human Tagged Lenti ORF Clone

Tag: mGFP

Symbol: Desmuslin
Synonyms: DMN; SYN
Mammalian Cell Puromycin

Selection:

Vector: pLenti-C-mGFP-P2A-Puro (PS100093)

E. coli Selection: Chloramphenicol (34 ug/mL)

ORF Nucleotide The ORF insert of this clone is exactly the same as(RC215288).

Sequence:

Restriction Sites: Sgfl-Mlul

Cloning Scheme:

 $[\]ensuremath{^*}$ The last codon before the Stop codon of the ORF.

ACCN: NM_145728

ORF Size: 4695 bp

Desmuslin (SYNM) (NM_145728) Human Tagged Lenti ORF Clone - RC215288L4

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method: 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: <u>NM 145728.1</u>

 RefSeq Size:
 7343 bp

 RefSeq ORF:
 4698 bp

 Locus ID:
 23336

 UniProt ID:
 015061

 Cytogenetics:
 15q26.3

MW: 172.7 kDa

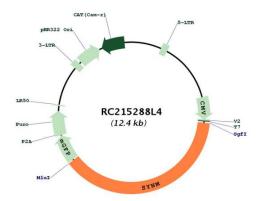

Gene Summary: The protein encoded by this gene is an intermediate filament (IF) family member. IF proteins

are cytoskeletal proteins that confer resistance to mechanical stress and are encoded by a dispersed multigene family. This protein has been found to form a linkage between desmin, which is a subunit of the IF network, and the extracellular matrix, and provides an important structural support in muscle. Two alternatively spliced variants encoding different isoforms

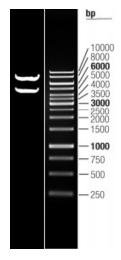

have been described for this gene. [provided by RefSeq, Jul 2008]
