Product datasheet for RC215365L2V

MOK protein kinase (MOK) (NM_014226) Human Tagged ORF Clone Lentiviral Particle

Product data:

| Product Type: | Lentiviral Particles |
|------------------------------|---|
| Product Name: | MOK protein kinase (MOK) (NM_014226) Human Tagged ORF Clone Lentiviral Particle |
| Symbol: | MOK protein kinase |
| Synonyms: | RAGE; RAGE-1; RAGE1; STK30 |
| Mammalian Cell Selection: | None |
| Vector: | pLenti-C-mGFP (PS100071) |
| Tag: | mGFP |
| ACCN: | NM_014226 |
| ORF Size: | 1257 bp |
| ORF Nucleotide Sequence: | The ORF insert of this clone is exactly the same as(RC215365). |
| OTI Disclaimer: | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u> |
| OTI Annotation: | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene. |
| RefSeq: | <u>NM 014226.1</u> |
| RefSeq Size: | 1954 bp |
| RefSeq ORF: | 1260 bp |
| Locus ID: | 5891 |
| UniProt ID: | <u>Q9UQ07</u> |
| Cytogenetics: | 14q32.31 |
| Domains: | pkinase, TyrKc, S_TKc |
| Protein Families: | Druggable Genome, Protein Kinase |

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

| | MOK protein kinase (MOK) (NM_014226) Human Tagged ORF Clone Lentiviral Particle – RC215365L2V |
|---------------|---|
| MW: | 47.8 kDa |
| Gene Summary: | This gene belongs to the MAP kinase superfamily. The gene was found to be regulated by caudal type transcription factor 2 (Cdx2) protein. The encoded protein, which is localized to epithelial cells in the intestinal crypt, may play a role in growth arrest and differentiation of cells of upper crypt and lower villus regions. Multiple alternatively spliced transcript variants encoding different isoforms have been observed for this gene. [provided by RefSeq, Dec 2012] |
