Product datasheet for RC215525L1V

HYAL1 (NM_007312) Human Tagged ORF Clone Lentiviral Particle

Product data:

| Product Type: | Lentiviral Particles |
|------------------------------|---|
| Product Name: | HYAL1 (NM_007312) Human Tagged ORF Clone Lentiviral Particle |
| Symbol: | HYAL1 |
| Synonyms: | HYAL-1; LUCA1; MGC45987; NAT6 |
| Mammalian Cell Selection: | None |
| Vector: | pLenti-C-Myc-DDK (PS100064) |
| Tag: | Myc-DDK |
| ACCN: | NM_007312 |
| ORF Size: | 1305 bp |
| ORF Nucleotide Sequence: | The ORF insert of this clone is exactly the same as(RC215525). |
| OTI Disclaimer: | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u> |
| OTI Annotation: | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene. |
| RefSeq: | <u>NM 007312.3</u> , <u>NP 009296.1</u> |
| RefSeq Size: | 2518 bp |
| RefSeq ORF: | 1307 bp |
| Locus ID: | 3373 |
| Cytogenetics: | 3p21.31 |
| Domains: | Glyco_hydro_56 |
| Protein Families: | Secreted Protein |
| Protein Pathways: | Glycosaminoglycan degradation, Lysosome, Metabolic pathways |

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

| | HYAL1 (NM_007312) Human Tagged ORF Clone Lentiviral Particle – RC215525L1V |
|---------------|---|
| MW: | 48.2 kDa |
| Gene Summary: | This gene encodes a lysosomal hyaluronidase. Hyaluronidases intracellularly degrade hyaluronan, one of the major glycosaminoglycans of the extracellular matrix. Hyaluronan is thought to be involved in cell proliferation, migration and differentiation. This enzyme is active at an acidic pH and is the major hyaluronidase in plasma. Mutations in this gene are associated with mucopolysaccharidosis type IX, or hyaluronidase deficiency. The gene is one of several related genes in a region of chromosome 3p21.3 associated with tumor suppression. Multiple transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Jul 2008] |
