

# Product datasheet for RC215656L3

# MAGEB1 (NM\_002363) Human Tagged Lenti ORF Clone

### **Product data:**

#### **Product Type: Expression Plasmids Product Name:** MAGEB1 (NM 002363) Human Tagged Lenti ORF Clone Tag: Myc-DDK Symbol: MAGEB1 Synonyms: CT3.1; DAM10; MAGE-Xp; MAGEL1 Mammalian Cell Puromycin Selection: Vector: pLenti-C-Myc-DDK-P2A-Puro (PS100092) E. coli Selection: Chloramphenicol (34 ug/mL) The ORF insert of this clone is exactly the same as(RC215656). **ORF** Nucleotide Sequence: **Restriction Sites:** Sgfl-Mlul **Cloning Scheme:** Cloning sites used for ORF Shuttling: ORF Sqf I Mlu I --- GCG ATC GC C ATG --- //--- NNN ACG CGT ---

ACCN: ORF Size: NM\_002363 1041 bp

	AGEB1 (NM_002363) Human Tagged Lenti ORF Clone – RC215656L3
OTI Disclaimer:	Due to the inherent nature of this plasmid, standard methods to replicate additional amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a reduced cost. Please contact our customer care team at <u>custsupport@origene.com</u> or by calling 301.340.3188 option 3 for pricing and delivery.
	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Met	<ul> <li>1. Centrifuge at 5,000xg for 5min.</li> <li>2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.</li> <li>3. Close the tube and incubate for 10 minutes at room temperature.</li> <li>4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.</li> <li>5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.</li> </ul>
RefSeq:	<u>NM 002363.3</u>
RefSeq Size:	1865 bp
RefSeq ORF:	1044 bp
Locus ID:	4112
UniProt ID:	<u>P43366</u>
Cytogenetics:	Xp21.2
MW:	38.9 kDa

### Section 2012 Content and Conte

Gene Summary:This gene is a member of the MAGEB gene family. The members of this family have their<br/>entire coding sequences located in the last exon, and the encoded proteins show 50 to 68%<br/>sequence identity to each other. The promoters and first exons of the MAGEB genes show<br/>considerable variability, suggesting that the existence of this gene family enables the same<br/>function to be expressed under different transcriptional controls. This gene is localized in the<br/>DSS (dosage-sensitive sex reversal) critical region, and expressed in testis and in a significant<br/>fraction of tumors of various histological types. This gene and other MAGEB members are<br/>clustered on chromosome Xp22-p21. Multiple alternatively spliced transcript variants<br/>encoding the same protein have been found for this gene, however, the full length nature of<br/>some variants has not been defined. [provided by RefSeq, Jul 2008]
