

## Product datasheet for RC216157

### beta 1 Spectrin (SPTB) (NM\_001024858) Human Tagged ORF Clone

#### Product data:

Product Type:	Expression Plasmids
Product Name:	beta 1 Spectrin (SPTB) (NM_001024858) Human Tagged ORF Clone
Tag:	Myc-DDK
Symbol:	beta 1 Spectrin
Synonyms:	EL3; HS2; HSPTB1; SPH2
Mammalian Cell Selection:	Neomycin
Vector:	pCMV6-Entry (PS100001)
E. coli Selection:	Kanamycin (25 ug/mL)
ORF Nucleotide Sequence:	>RC216157 representing NM_001024858 Red=Cloning site Blue=ORF Green=Tags(s)

Chromatograms: [https://cdn.origene.com/chromatograms/mk8017\\_d03.zip](https://cdn.origene.com/chromatograms/mk8017_d03.zip)

Restriction Sites: Sgfl-MluI

**Cloning Scheme:**

**ACCN:** NM\_001024858

**ORF Size:** 6984 bp

**OTI Disclaimer:** The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. [More info](#)

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.

**Components:** The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

**Reconstitution Method:**

1. Centrifuge at 5,000xg for 5min.
2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.
3. Close the tube and incubate for 10 minutes at room temperature.
4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.
5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.

**RefSeq:** [NM\\_001024858.3](#)

**RefSeq Size:** 10064 bp

**RefSeq ORF:** 6987 bp

**Locus ID:** 6710

**UniProt ID:** [P11277](#)

**Cytogenetics:** 14q23.3

**Protein Families:** Druggable Genome

**MW:** 267.6 kDa

**Gene Summary:** This locus encodes a member of the spectrin gene family. Spectrin proteins, along with ankyrin, play a role in cell membrane organization and stability. The protein encoded by this locus functions in stability of erythrocyte membranes, and mutations in this gene have been associated with spherocytosis type 2, hereditary elliptocytosis, and neonatal hemolytic anemia. Alternatively spliced transcript variants have been described. [provided by RefSeq, Nov 2009]
