

# Product datasheet for RC216244L3

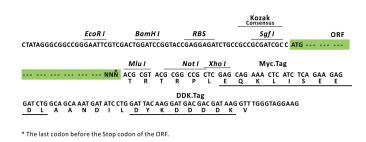

## TAC1 (NM\_013998) Human Tagged Lenti ORF Clone

### **Product data:**

#### OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

Product Type:	Expression Plasmids		
Product Name:	TAC1 (NM_013998) Human Tagged Lenti ORF Clone		
Tag:	Myc-DDK		
Symbol:	TAC1		
Synonyms:	Hs.2563; NK2; NKNA; NPK; TAC2		
Mammalian Cell Selection:	Puromycin		
Vector:	pLenti-C-Myc-DDK-P2A-Puro (PS100092)		
E. coli Selection:	Chloramphenicol (34 ug/mL)		
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(RC216244).		
<b>Restriction Sites:</b>	Sgfl-Mlul		
Cloning Scheme:	Cloning sites used for ORF Shuttling: Sgf I ORF Mlu I GCG ATC GC C ATG // NNN ACG CGT		

ACCN: ORF Size: NM\_013998 288 bp

## **GRIGENE** TAC1 (NM\_013998) Human Tagged Lenti ORF Clone – RC216244L3

of DNA in E. coli are highly likely to result OriGene does not guarantee the capabili of DNA can be purchased from OriGene v reduced cost. Please contact our customs calling 301.340.3188 option 3 for pricing.The molecular sequence of this clone alig reference only. However, individual trans naturally occurring variations (e.g. polym clone is substantially in agreement with t variants is recommended prior to use. MOTI Annotation:This clone was engineered to express the varies depending on the nature of the geComponents:The ORF clone is ion-exchange column pu containing 10ug of transfection-ready, drReconstitution Method:1. Centrifuge at 5,000xg for 5min. 2. Carefully open the tube and add 100ul 3. Close the tube and incubate for 10 mir 4. Briefly vortex the tube and then do a q at the bottom. 5. Store the suspended plasmid at -20°C. shipping when stored at -20°C.RefSeq:NM 013998.1RefSeq ORF:291 bpLocus ID:6863UniProt ID:P20366Cytogenetics:7q21.3Protein Families:Druggable Genome, Secreted ProteinMW:11.38 kDaGene Summary:This gene encodes four products of the t neurokinin A, as well as the related pepti These hormones are thought to function receptors and smooth muscle cells. They	
reference only. However, individual trans naturally occurring variations (e.g. polym clone is substantially in agreement with t variants is recommended prior to use. MOTI Annotation:This clone was engineered to express the varies depending on the nature of the geComponents:The ORF clone is ion-exchange column pr containing 10ug of transfection-ready, drReconstitution Method:1. Centrifuge at 5,000xg for 5min. 2. Carefully open the tube and add 100ul 3. Close the tube and incubate for 10 mir 4. Briefly vortex the tube and then do a q at the bottom. 5. Store the suspended plasmid at -20°C.RefSeq:NM 013998.1RefSeq ORF:291 bpLocus ID:P20366Cytogenetics:7q21.3Protein Families:Druggable Genome, Secreted ProteinMW:11.38 kDaGene Summary:This gene encodes four products of the ta neurokinin A, as well as the related peptid These hormones are thought to function receptors and smooth muscle cells. They	id, standard methods to replicate additional amounts in mutations and/or rearrangements. Therefore, ity to replicate this plasmid DNA. Additional amounts with batch-specific, full-sequence verification at a er care team at <u>custsupport@origene.com</u> or by and delivery.
varies depending on the nature of the geComponents:The ORF clone is ion-exchange column pr containing 10ug of transfection-ready, drReconstitution Method:1. Centrifuge at 5,000xg for 5min. 2. Carefully open the tube and add 100ul 3. Close the tube and incubate for 10 mir 4. Briefly vortex the tube and then do a q at the bottom. 5. Store the suspended plasmid at -20°C. shipping when stored at -20°C.RefSeq:NM 013998.1RefSeq ORF:291 bpLocus ID:6863UniProt ID:P20366Cytogenetics:Oruggable Genome, Secreted ProteinMW:11.38 kDaGene Summary:This gene encodes four products of the ta neurokinin A, as well as the related peptin These hormones are thought to function receptors and smooth muscle cells. They	gns with the gene accession number as a point of script sequences of the same gene can differ through orphisms), each with its own valid existence. This the reference, but a complete review of all prevailing lore info
Reconstitution Method:1. Centrifuge at 5,000xg for 5min. 2. Carefully open the tube and add 100ul 3. Close the tube and incubate for 10 mir 4. Briefly vortex the tube and then do a q at the bottom. 5. Store the suspended plasmid at -20°C.RefSeq:NM 013998.1RefSeq Size:1003 bpRefSeq ORF:291 bpLocus ID:6863UniProt ID:P20366Cytogenetics:7q21.3Protein Families:Druggable Genome, Secreted ProteinMW:11.38 kDaGene Summary:This gene encodes four products of the tare neurokinin A, as well as the related peption These hormones are thought to function receptors and smooth muscle cells. They	e complete ORF with an expression tag. Expression ene.
