## Product datasheet for RC216502L1

## IL24 (NM_006850) Human Tagged Lenti ORF Clone

## Product data:

## Product Type: Expression Plasmids

Product Name:
IL24 (NM_006850) Human Tagged Lenti ORF Clone

Tag:
Symbol:
Synonyms:
Mammalian Cell
Selection:
Vector:
E. coli Selection:

ORF Nucleotide
Sequence:
Restriction Sites:
Cloning Scheme:

Myc-DDK
IL24
C49A; FISP; IL10B; MDA7; MOB5; ST16
None
pLenti-C-Myc-DDK (PS100064)
Chloramphenicol ( $34 \mathrm{ug} / \mathrm{mL}$ )
The ORF insert of this clone is exactly the same as(RC216502).

Sgfl-Mlul

Cloning sites used for ORF Shuttling:

GAT CTG GCA GCA AAT GAT ATC CTG GAT TAC AAG GAT GAC GAC GAT AAG GTT TAA ACGGCCGGCC $\begin{array}{llllllllllllllllll}\mathrm{D} & \mathrm{L} & \mathrm{A} & \mathrm{A} & \mathrm{N} & \mathrm{D} & \mathrm{I} & \mathrm{L} & \mathrm{D} & \mathrm{Y} & \mathrm{K} & \mathrm{D} & \mathrm{D} & \mathrm{D} & \mathrm{D} & \mathrm{K} & \mathrm{V} & \text { stop }\end{array}$

* The last codon before the Stop codon of the ORF.

Gene Summary:
$\begin{array}{ll}\text { Components: } & \text { The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube } \\ \text { containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with } 100 \text { ul of water). }\end{array}$
The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube
containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
2. Carefully open the tube and add 100 ul of sterile water to dissolve the DNA.
3. Close the tube and incubate for 10 minutes at room temperature.
4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.
5. Store the suspended plasmid at $-20^{\circ} \mathrm{C}$. The DNA is stable for at least one year from date of shipping when stored at $-20^{\circ} \mathrm{C}$.
The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. More info

This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.

Cytokine-cytokine receptor interaction, Jak-STAT signaling pathway
23.8 kDa

This gene encodes a member of the IL10 family of cytokines. It was identified as a gene induced during terminal differentiation in melanoma cells. The protein encoded by this gene can induce apoptosis selectively in various cancer cells. Overexpression of this gene leads to elevated expression of several GADD family genes, which correlates with the induction of apoptosis. The phosphorylation of mitogen-activated protein kinase 14 (MAPK7/P38), and heat shock 27kDa protein 1 (HSPB2/HSP27) are found to be induced by this gene in melanoma cells, but not in normal immortal melanocytes. Alternatively spliced transcript variants encoding distinct isoforms have been reported. [provided by RefSeq, Jul 2008]
