## IRF5 (NM\_001098628) Human Tagged ORF Clone Lentiviral Particle

**Product data:** 

**Product Type:** Lentiviral Particles

Product Name: IRF5 (NM\_001098628) Human Tagged ORF Clone Lentiviral Particle

Symbol: IRF5

**Synonyms:** interferon regulatory factor 5; SLEB10

Mammalian Cell

Selection:

Puromycin

**Vector:** pLenti-C-Myc-DDK-P2A-Puro (PS100092)

Tag: Myc-DDK

**ACCN:** NM\_001098628

ORF Size: 1464 bp

**ORF Nucleotide** 

The ORF insert of this clone is exactly the same as(RC216505).

Sequence:

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally accurring variations (e.g. polymorphisms), each with its own valid existence. This

naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**RefSeq:** NM 001098628.1, NP 001092098.1

RefSeq Size: 2822 bp
RefSeq ORF: 1466 bp
Locus ID: 3663
Cytogenetics: 7q32.1

**Protein Families:** Transcription Factors

**Protein Pathways:** Toll-like receptor signaling pathway

**MW:** 54.8 kDa

## **Gene Summary:**

This gene encodes a member of the interferon regulatory factor (IRF) family, a group of transcription factors with diverse roles, including virus-mediated activation of interferon, and modulation of cell growth, differentiation, apoptosis, and immune system activity. Members of the IRF family are characterized by a conserved N-terminal DNA-binding domain containing tryptophan (W) repeats. Alternative promoter use and alternative splicing result in multiple transcript variants, and a 30-nt indel polymorphism (SNP rs60344245) can result in loss of a 10-aa segment. [provided by RefSeq, Dec 2016]
