

Product datasheet for **RC216750L4V**

ADAMTS17 (NM_139057) Human Tagged ORF Clone Lentiviral Particle

Product data:

| | |
|---------------------------|--|
| Product Type: | Lentiviral Particles |
| Product Name: | ADAMTS17 (NM_139057) Human Tagged ORF Clone Lentiviral Particle |
| Symbol: | ADAMTS17 |
| Synonyms: | WMS4 |
| Mammalian Cell Selection: | Puromycin |
| Vector: | pLenti-C-mGFP-P2A-Puro (PS100093) |
| Tag: | mGFP |
| ACCN: | NM_139057 |
| ORF Size: | 3285 bp |
| ORF Nucleotide Sequence: | The ORF insert of this clone is exactly the same as(RC216750). |
| OTI Disclaimer: | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. More info |
| OTI Annotation: | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene. |
| RefSeq: | NM_139057.1 |
| RefSeq Size: | 3470 bp |
| RefSeq ORF: | 3288 bp |
| Locus ID: | 170691 |
| UniProt ID: | Q8TE56 |
| Cytogenetics: | 15q26.3 |
| Protein Families: | Druggable Genome |
| MW: | 118.3 kDa |

Gene Summary:

This gene encodes a member of the ADAMTS (a disintegrin and metalloproteinase with thrombospondin motifs) protein family. ADAMTS family members share several distinct protein modules, including a propeptide region, a metalloproteinase domain, a disintegrin-like domain, and a thrombospondin type 1 (TS) motif. Individual members of this family differ in the number of C-terminal TS motifs, and some have unique C-terminal domains. The encoded preproprotein is proteolytically processed to generate the mature protein, which may promote breast cancer cell growth and survival. Mutations in this gene are associated with a Weill-Marchesani-like syndrome, which is characterized by lenticular myopia, ectopia lentis, glaucoma, spherophakia, and short stature. [provided by RefSeq, May 2016]
