Cadherin 8 (CDH8) (NM_001796) Human Tagged Lenti ORF Clone

Product data:

Product Type: Expression Plasmids

Product Name: Cadherin 8 (CDH8) (NM_001796) Human Tagged Lenti ORF Clone

Tag:Myc-DDKSymbol:Cadherin 8Synonyms:Nbla04261

Mammalian Cell None

Selection:

Vector:pLenti-C-Myc-DDK (PS100064)E. coli Selection:Chloramphenicol (34 ug/mL)

ORF Nucleotide The ORF insert of this clone is exactly the same as(RC217249).

Sequence:

Restriction Sites: Sgfl-Mlul

Cloning Scheme:

^{*} The last codon before the Stop codon of the ORF.

ACCN: NM_001796

ORF Size: 2397 bp

Cadherin 8 (CDH8) (NM_001796) Human Tagged Lenti ORF Clone - RC217249L1

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method: 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: <u>NM 001796.2</u>

 RefSeq Size:
 2929 bp

 RefSeq ORF:
 2400 bp

 Locus ID:
 1006

 UniProt ID:
 P55286

Cytogenetics: 16q21

Domains: Cadherin C term, CA

Protein Families: Transmembrane

MW: 88.25 kDa

Gene Summary: This gene encodes a type II classical cadherin from the cadherin superfamily, integral

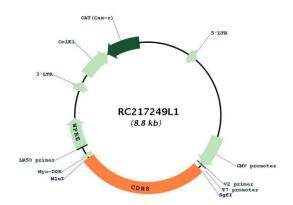

membrane proteins that mediate calcium-dependent cell-cell adhesion. Mature cadherin proteins are composed of a large N-terminal extracellular domain, a single membrane-spanning domain, and a small, highly conserved C-terminal cytoplasmic domain. The extracellular domain consists of 5 subdomains, each containing a cadherin motif, and appears to determine the specificity of the protein's homophilic cell adhesion activity. Type II (atypical) cadherins are defined based on their lack of a HAV cell adhesion recognition sequence specific to type I cadherins. This particular cadherin is expressed in brain and is

putatively involved in synaptic adhesion, axon outgrowth and guidance. [provided by RefSeq,

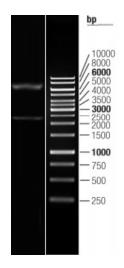

Jul 2008]
