Product datasheet for RC217458L2

cadherin 10 (CDH10) (NM_006727) Human Tagged Lenti ORF Clone

Product data:

Product Type:	Expression Plasmids
Product Name:	cadherin 10 (CDH10) (NM_006727) Human Tagged Lenti ORF Clone
Tag:	mGFP
Symbol:	cadherin 10
Mammalian Cell Selection:	None
Vector:	pLenti-C-mGFP (PS100071)
E. coli Selection:	Chloramphenicol (34 ug/mL)
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(RC217458).
Restriction Sites:	Sgfl-RsrII
Cloning Scheme:	Cloning sites used for ORF Shuttling: Sgf I ORF Rsr II GCG ATC GC ATG// NNN AGC GGA CCG

* The last codon before the Stop codon of the ORF.

ACCN: ORF Size: NM_006727 2364 bp

CRIGENE cadherin 10 (CDH10) (NM_006727) Human Tagged Lenti ORF Clone – RC217458L2	
OTI Disclaimer:	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Method:	 Centrifuge at 5,000xg for 5min. Carefully open the tube and add 100ul of sterile water to dissolve the DNA. Close the tube and incubate for 10 minutes at room temperature. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.
RefSeq:	<u>NM 006727.2</u>
RefSeq Size:	3261 bp
RefSeq ORF:	2367 bp
Locus ID:	1008
UniProt ID:	<u>Q9Y6N8</u>
Cytogenetics:	5p14.2-p14.1
Domains:	Cadherin_C_term, CA
Protein Families:	Transmembrane
MW:	88.3 kDa
Gene Summary:	This gene encodes a type II classical cadherin of the cadherin superfamily. Alternative splicing of this gene results in multiple transcript variants. At least one of these variants encodes a preproprotein that is proteolytically processed to generate the mature cadherin protein. These integral membrane proteins mediate calcium-dependent cell-cell adhesion and are composed of a large N-terminal extracellular domain, a single membrane-spanning domain, and a small, highly conserved C-terminal cytoplasmic domain. The extracellular domain consists of 5 subdomains, each containing a cadherin motif, and appears to determine the specificity of the protein's homophilic cell adhesion activity. Type II (atypical) cadherins are defined based on their lack of a histidine-alanine-valine (HAV) cell adhesion recognition sequence specific to type I cadherins. This particular cadherin is predominantly expressed in brain and is putatively involved in synaptic adhesions, axon outgrowth and guidance. Mutations in this gene may be associated with lung squamous cell carcinoma and colorectal

cancer in human patients. [provided by RefSeq, Nov 2015]
