GPR18 (NM_001098200) Human Tagged Lenti ORF Clone

Product data:

Product Type: Expression Plasmids

Product Name: GPR18 (NM_001098200) Human Tagged Lenti ORF Clone

Tag:mGFPSymbol:GPR18

Mammalian Cell Puromycin

Selection:

Vector: pLenti-C-mGFP-P2A-Puro (PS100093)

E. coli Selection: Chloramphenicol (34 ug/mL)

ORF Nucleotide

The ORF insert of this clone is exactly the same as(RC217482).

Sequence:

Restriction Sites: Sgfl-Mlul

Cloning Scheme:

ACCN: NM_001098200

ORF Size: 993 bp

GPR18 (NM_001098200) Human Tagged Lenti ORF Clone - RC217482L4

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method: 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: <u>NM 001098200.1</u>, <u>NP 001091670.1</u>

RefSeq Size:1484 bpRefSeq ORF:996 bpLocus ID:2841

UniProt ID: Q14330 Cytogenetics: 13q32.3

Protein Families: Druggable Genome, GPCR, Transmembrane

MW: 38 kDa

Gene Summary: Receptor for endocannabinoid N-arachidonyl glycine (NAGly) (PubMed:16844083,

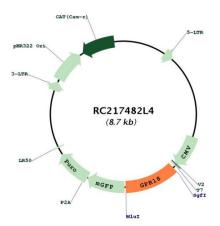

PubMed:24762058, PubMed:27572937). However, conflicting results about the role of NAGly as an agonist are reported (PubMed:27018161). Can also be activated by plant-derived and synthetic cannabinoid agonists (PubMed:24762058). The activity of this receptor is mediated by G proteins which inhibit adenylyl cyclase (PubMed:16844083). May contribute to regulation of the immune system. Is required for normal homeostasis of CD8+ subsets of intraepithelial lymphocytes (IELs) (CD8alphaalpha and CD8alphabeta IELs)in small intstine by supporting preferential migration of CD8alphaalpha T-cells to intraepithelial compartment over lamina propria compartment, and by mediating their reconstitution into small intestine after bone marrow transplant (By similarity). Plays a role in hypotensive responses, mediating reduction in intraocular and blood pressure (By similarity). Mediates NAGly-induced process of

reorganization of actin filaments and induction of acrosomal exocytosis (PubMed:27572937).
