

Product datasheet for **RC217598**

NK TR protein (NKTR) (NM_005385) Human Tagged ORF Clone

Product data:

Product Type:	Expression Plasmids
Product Name:	NK TR protein (NKTR) (NM_005385) Human Tagged ORF Clone
Tag:	Myc-DDK
Symbol:	NK TR protein
Synonyms:	p104
Mammalian Cell Selection:	Neomycin
Vector:	pCMV6-Entry (PS100001)
E. coli Selection:	Kanamycin (25 ug/mL)
ORF Nucleotide Sequence:	>RC217598 representing NM_005385 Red=Cloning site Blue=ORF Green=Tags(s)

Chromatograms: https://cdn.origene.com/chromatograms/mk8015_a12.zip

Restriction Sites: SgfI-MluI

Cloning Scheme:

ACCN: NM_005385

ORF Size: 4386 bp

OTI Disclaimer:	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. More info
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Method:	1. Centrifuge at 5,000xg for 5min. 2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA. 3. Close the tube and incubate for 10 minutes at room temperature. 4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom. 5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.
Note:	Plasmids are not sterile. For experiments where strict sterility is required, filtration with 0.22um filter is required.
RefSeq:	NM_005385.4
RefSeq Size:	7312 bp
RefSeq ORF:	4389 bp
Locus ID:	4820
UniProt ID:	P30414
Cytogenetics:	3p22.1
Domains:	pro_isomerase
Protein Families:	Druggable Genome
MW:	165.5 kDa
Gene Summary:	This gene encodes a membrane-anchored protein with a hydrophobic amino terminal domain and a cyclophilin-like PPIase domain. It is present on the surface of natural killer cells and facilitates their binding to targets. Its expression is regulated by IL2 activation of the cells. [provided by RefSeq, Jul 2008]
