

Product datasheet for **RC217708L3V**

Argininosuccinate Lyase (ASL) (NM_001024946) Human Tagged ORF Clone Lentiviral Particle

Product data:

| | |
|---------------------------|--|
| Product Type: | Lentiviral Particles |
| Product Name: | Argininosuccinate Lyase (ASL) (NM_001024946) Human Tagged ORF Clone Lentiviral Particle |
| Symbol: | Argininosuccinate Lyase |
| Synonyms: | ASAL |
| Mammalian Cell Selection: | Puromycin |
| Vector: | pLenti-C-Myc-DDK-P2A-Puro (PS100092) |
| Tag: | Myc-DDK |
| ACCN: | NM_001024946 |
| ORF Size: | 1314 bp |
| ORF Nucleotide Sequence: | The ORF insert of this clone is exactly the same as(RC217708). |
| OTI Disclaimer: | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. More info |
| OTI Annotation: | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene. |
| RefSeq: | NM_001024946.1 |
| RefSeq Size: | 1983 bp |
| RefSeq ORF: | 1317 bp |
| Locus ID: | 435 |
| Cytogenetics: | 7q11.21 |
| Protein Pathways: | Alanine, aspartate and glutamate metabolism, Arginine and proline metabolism, Metabolic pathways |
| MW: | 48.6 kDa |

Gene Summary:

This gene encodes a member of the lyase 1 family. The encoded protein forms a cytosolic homotetramer and primarily catalyzes the reversible hydrolytic cleavage of argininosuccinate into arginine and fumarate, an essential step in the liver in detoxifying ammonia via the urea cycle. Mutations in this gene result in the autosomal recessive disorder argininosuccinic aciduria, or argininosuccinic acid lyase deficiency. A nontranscribed pseudogene is also located on the long arm of chromosome 22. Alternatively spliced transcript variants encoding different isoforms have been described. [provided by RefSeq, Jul 2008]
