

Product datasheet for **RC217773L4V**

Tau (MAPT) (NM_016834) Human Tagged ORF Clone Lentiviral Particle

Product data:

| | |
|---------------------------|--|
| Product Type: | Lentiviral Particles |
| Product Name: | Tau (MAPT) (NM_016834) Human Tagged ORF Clone Lentiviral Particle |
| Symbol: | Tau |
| Synonyms: | DDPAC; FTDP-17; MAPTL; MSTD; MTBT1; MTBT2; PPND; PPP1R103; TAU; tau-40 |
| Mammalian Cell Selection: | Puromycin |
| Vector: | pLenti-C-mGFP-P2A-Puro (PS100093) |
| Tag: | mGFP |
| ACCN: | NM_016834 |
| ORF Size: | 1149 bp |
| ORF Nucleotide Sequence: | The ORF insert of this clone is exactly the same as(RC217773). |
| OTI Disclaimer: | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. More info |
| OTI Annotation: | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene. |
| RefSeq: | NM_016834.2 |
| RefSeq Size: | 5557 bp |
| RefSeq ORF: | 1152 bp |
| Locus ID: | 4137 |
| UniProt ID: | P10636 |
| Cytogenetics: | 17q21.31 |
| Domains: | tubulin-binding |
| Protein Families: | Druggable Genome |

Protein Pathways: Alzheimer's disease, MAPK signaling pathway

MW: 39.8 kDa

Gene Summary: This gene encodes the microtubule-associated protein tau (MAPT) whose transcript undergoes complex, regulated alternative splicing, giving rise to several mRNA species. MAPT transcripts are differentially expressed in the nervous system, depending on stage of neuronal maturation and neuron type. MAPT gene mutations have been associated with several neurodegenerative disorders such as Alzheimer's disease, Pick's disease, frontotemporal dementia, cortico-basal degeneration and progressive supranuclear palsy. [provided by RefSeq, Jul 2008]
