

Product datasheet for **RC217779L3V**

IKZF3 (NM_183230) Human Tagged ORF Clone Lentiviral Particle

Product data:

| | |
|---------------------------|--|
| Product Type: | Lentiviral Particles |
| Product Name: | IKZF3 (NM_183230) Human Tagged ORF Clone Lentiviral Particle |
| Symbol: | IKZF3 |
| Synonyms: | AIO; AIOLOS; ZNFN1A3 |
| Mammalian Cell Selection: | Puromycin |
| Vector: | pLenti-C-Myc-DDK-P2A-Puro (PS100092) |
| Tag: | Myc-DDK |
| ACCN: | NM_183230 |
| ORF Size: | 1410 bp |
| ORF Nucleotide Sequence: | The ORF insert of this clone is exactly the same as(RC217779). |
| OTI Disclaimer: | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. More info |
| OTI Annotation: | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene. |
| RefSeq: | NM_183230.1 |
| RefSeq Size: | 2320 bp |
| RefSeq ORF: | 1413 bp |
| Locus ID: | 22806 |
| UniProt ID: | Q9UKT9 |
| Cytogenetics: | 17q12-q21.1 |
| MW: | 53.6 kDa |

Gene Summary:

This gene encodes a member of the Ikaros family of zinc-finger proteins. Three members of this protein family (Ikaros, Aiolos and Helios) are hematopoietic-specific transcription factors involved in the regulation of lymphocyte development. This gene product is a transcription factor that is important in the regulation of B lymphocyte proliferation and differentiation. Both Ikaros and Aiolos can participate in chromatin remodeling. Regulation of gene expression in B lymphocytes by Aiolos is complex as it appears to require the sequential formation of Ikaros homodimers, Ikaros/Aiolos heterodimers, and Aiolos homodimers. Several alternative transcripts encoding different isoforms have been described, as well as some non-protein coding variants. [provided by RefSeq, Apr 2012]
