

Product datasheet for RC217819L4

RTN3 (NM_006054) Human Tagged Lenti ORF Clone

Product data:

Product Type: Expression Plasmids

Product Name: RTN3 (NM_006054) Human Tagged Lenti ORF Clone

Tag: mGFP Symbol: RTN3

Synonyms: ASYIP; HAP; NSPL2; NSPLII; RTN3-A1

Mammalian Cell Puromycin

Selection:

Vector: pLenti-C-mGFP-P2A-Puro (PS100093)

E. coli Selection: Chloramphenicol (34 ug/mL)

ORF Nucleotide The ORF insert of this clone is exactly the same as(RC217819).

Sequence:

Restriction Sites: Sgfl-Mlul

Cloning Scheme:

^{*} The last codon before the Stop codon of the ORF

ACCN: NM_006054

ORF Size: 708 bp

OriGene Technologies, Inc. 9620 Medical Center Drive, Ste 200

RTN3 (NM_006054) Human Tagged Lenti ORF Clone - RC217819L4

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method: 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: <u>NM 006054.2</u>

 RefSeq Size:
 2583 bp

 RefSeq ORF:
 711 bp

 Locus ID:
 10313

 UniProt ID:
 095197

Cytogenetics: 11q13.1

Domains: Reticulon

Protein Families: Transmembrane

MW: 25.4 kDa

Gene Summary: This gene belongs to the reticulon family of highly conserved genes that are preferentially

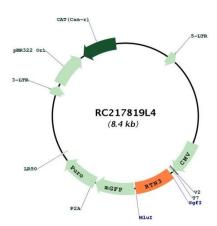

expressed in neuroendocrine tissues. This family of proteins interact with, and modulate the activity of beta-amyloid converting enzyme 1 (BACE1), and the production of amyloid-beta. An increase in the expression of any reticulon protein substantially reduces the production of amyloid-beta, suggesting that reticulon proteins are negative modulators of BACE1 in cells. Alternatively spliced transcript variants encoding different isoforms have been found for this

gene, and pseudogenes of this gene are located on chromosomes 4 and 12. [provided by

RefSeq, May 2012]
