Tryptophanyl tRNA synthetase (WARS) (NM_213645) Human Tagged Lenti ORF Clone

Product data:

Product Type: Expression Plasmids

Product Name: Tryptophanyl tRNA synthetase (WARS) (NM 213645) Human Tagged Lenti ORF Clone

Tag: mGFP

Symbol: Tryptophanyl tRNA synthetase

Synonyms: GAMMA-2; HMN9; IFI53; IFP53; WARS

Mammalian Cell

Selection:

Puromycin

Vector: pLenti-C-mGFP-P2A-Puro (PS100093)

E. coli Selection: Chloramphenicol (34 ug/mL)

ORF Nucleotide

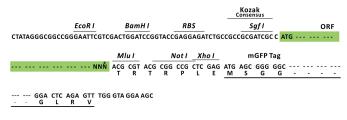

The ORF insert of this clone is exactly the same as(RC218539).

Sequence:

Restriction Sites: Sgfl-Mlul

Cloning Scheme:

^{*} The last codon before the Stop codon of the ORF

ACCN: NM_213645

ORF Size: 1416 bp

Tryptophanyl tRNA synthetase (WARS) (NM_213645) Human Tagged Lenti ORF Clone – RC218539L4

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method: 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: <u>NM 213645.1</u>, <u>NP 998810.1</u>

RefSeq Size: 2488 bp
RefSeq ORF: 1293 bp
Locus ID: 7453
UniProt ID: P23381

Cytogenetics: 14q32.2

Protein Pathways: Aminoacyl-tRNA biosynthesis, Tryptophan metabolism

Druggable Genome

MW: 53.2 kDa

Protein Families:

Gene Summary: Aminoacyl-tRNA synthetases catalyze the aminoacylation of tRNA by their cognate amino

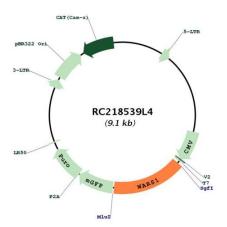

acid. Because of their central role in linking amino acids with nucleotide triplets contained in tRNAs, aminoacyl-tRNA synthetases are thought to be among the first proteins that appeared in evolution. Two forms of tryptophanyl-tRNA synthetase exist, a cytoplasmic form, named WARS, and a mitochondrial form, named WARS2. Tryptophanyl-tRNA synthetase (WARS) catalyzes the aminoacylation of tRNA(trp) with tryptophan and is induced by interferon. Tryptophanyl-tRNA synthetase belongs to the class I tRNA synthetase family. Four transcript

variants encoding two different isoforms have been found for this gene. [provided by RefSeq,

Jul 2008]
