

Product datasheet for RC218918L3V

OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

LRP6 (NM_002336) Human Tagged ORF Clone Lentiviral Particle

Product data:

Product Type: Lentiviral Particles

Product Name: LRP6 (NM_002336) Human Tagged ORF Clone Lentiviral Particle

Symbol: LRP6

Synonyms: ADCAD2; STHAG7

Mammalian Cell

Selection:

Puromycin

Vector: pLenti-C-Myc-DDK-P2A-Puro (PS100092)

Tag:Myc-DDKACCN:NM_002336

ORF Size: 4839 bp

ORF Nucleotide

The ORF insert of this clone is exactly the same as(RC218918).

Sequence:

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through

naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

RefSeg: NM 002336.1, NP 002327.1

 RefSeq Size:
 5301 bp

 RefSeq ORF:
 4842 bp

 Locus ID:
 4040

 UniProt ID:
 075581

 Cytogenetics:
 12p13.2

Domains: Idl_recept_b, Idl_recept_a, EGF, EGF

Protein Families: Druggable Genome, Transmembrane

LRP6 (NM_002336) Human Tagged ORF Clone Lentiviral Particle - RC218918L3V

Protein Pathways: Wnt signaling pathway

MW: 180.44 kDa

Gene Summary: This gene encodes a member of the low density lipoprotein (LDL) receptor gene family. LDL

receptors are transmembrane cell surface proteins involved in receptor-mediated

endocytosis of lipoprotein and protein ligands. The protein encoded by this gene functions as

a receptor or, with Frizzled, a co-receptor for Wnt and thereby transmits the canonical Wnt/beta-catenin signaling cascade. Through its interaction with the Wnt/beta-catenin signaling cascade this gene plays a role in the regulation of cell differentiation, proliferation, and migration and the development of many cancer types. This protein undergoes gamma-secretase dependent RIP- (regulated intramembrane proteolysis) processing but the precise locations of the cleavage sites have not been determined.[provided by RefSeq, Dec 2009]
