

## Product datasheet for **RC218931L4V**

### CaMKK (CAMKK1) (NM\_172206) Human Tagged ORF Clone Lentiviral Particle

#### Product data:

|                           |  |
|---------------------------|--|
| Product Type:             | Lentiviral Particles   |
| Product Name:             | CaMKK (CAMKK1) (NM_172206) Human Tagged ORF Clone Lentiviral Particle  |
| Symbol:                   | CaMKK  |
| Synonyms:                 | CAMKKA   |
| Mammalian Cell Selection: | Puromycin  |
| Vector:                   | pLenti-C-mGFP-P2A-Puro (PS100093)  |
| Tag:                      | mGFP   |
| ACCN:                     | NM_172206  |
| ORF Size:                 | 1515 bp  |
| ORF Nucleotide Sequence:  | The ORF insert of this clone is exactly the same as(RC218931).   |
| OTI Disclaimer:           | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <a href="#">More info</a> |
| OTI Annotation:           | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.   |
| RefSeq:                   | <a href="#">NM_172206.1</a>  |
| RefSeq Size:              | 3529 bp  |
| RefSeq ORF:               | 1599 bp  |
| Locus ID:                 | 84254  |
| UniProt ID:               | <a href="#">Q8N5S9</a>   |
| Cytogenetics:             | 17p13.2  |
| Protein Families:         | Druggable Genome, Protein Kinase   |
| Protein Pathways:         | Adipocytokine signaling pathway  |

**MW:** 55.7 kDa

**Gene Summary:** The product of this gene belongs to the Serine/Threonine protein kinase family, and to the Ca(2+)/calmodulin-dependent protein kinase subfamily. This protein plays a role in the calcium/calmodulin-dependent (CaM) kinase cascade. Three transcript variants encoding two distinct isoforms have been identified for this gene. [provided by RefSeq, Jul 2008]
