Product datasheet for RC218964L4V

PTP gamma (PTPRG) (NM_002841) Human Tagged ORF Clone Lentiviral Particle

Product data:

Product Type:	Lentiviral Particles
Product Name:	PTP gamma (PTPRG) (NM_002841) Human Tagged ORF Clone Lentiviral Particle
Symbol:	PTP gamma
Synonyms:	HPTPG; PTPG; R-PTP-GAMMA; RPTPG
Mammalian Cell Selection:	Puromycin
Vector:	pLenti-C-mGFP-P2A-Puro (PS100093)
Tag:	mGFP
ACCN:	NM_002841
ORF Size:	4335 bp
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(RC218964).
OTI Disclaimer:	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
RefSeq:	<u>NM 002841.2, NP 002832.2</u>
RefSeq Size:	5787 bp
RefSeq ORF:	4338 bp
Locus ID:	5793
UniProt ID:	<u>P23470</u>
Cytogenetics:	3p14.2
Domains:	Y_phosphatase, carb_anhydrase, PTPc_motif, FN3
Protein Families:	Druggable Genome, Phosphatase

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

	PTP gamma (PTPRG) (NM_002841) Human Tagged ORF Clone Lentiviral Particle – RC218964L4V
MW:	161.8 kDa
Gene Summary:	The protein encoded by this gene is a member of the protein tyrosine phosphatase (PTP) family. PTPs are known to be signaling molecules that regulate a variety of cellular processes including cell growth, differentiation, mitotic cycle, and oncogenic transformation. This PTP possesses an extracellular region, a single transmembrane region, and two tandem intracytoplasmic catalytic domains, and thus represents a receptor-type PTP. The extracellular region of this PTP contains a carbonic anhydrase-like (CAH) domain, which is also found in the extracellular region of PTPRBETA/ZETA. This gene is located in a chromosomal region that is frequently deleted in renal cell carcinoma and lung carcinoma, thus is thought to be a candidate tumor suppressor gene. [provided by RefSeq, Jul 2008]
