

# Product datasheet for RC218976L4

## MRP2 (ABCC2) (NM\_000392) Human Tagged Lenti ORF Clone

### Product data:

| Product Type:                | Expression Plasmids   |
|------------------------------|---|
| Product Name:                | MRP2 (ABCC2) (NM_000392) Human Tagged Lenti ORF Clone                                   |
| Tag:                         | mGFP  |
| Symbol:                      | MRP2  |
| Synonyms:                    | ABC30; CMOAT; cMRP; DJS; MRP2   |
| Mammalian Cell<br>Selection: | Puromycin   |
| Vector:                      | pLenti-C-mGFP-P2A-Puro (PS100093)   |
| E. coli Selection:           | Chloramphenicol (34 ug/mL)  |
| ORF Nucleotide<br>Sequence:  | The ORF insert of this clone is exactly the same as(RC218976).                          |
| <b>Restriction Sites:</b>    | Sgfl-Mlul   |
| Cloning Scheme:              |   |
|                              | Cloning sites used for ORF Shuttling:   |
|                              | Sgf I         ORF         Mlu I           GCG ATC GCC         ATG// NNÑ         ACG CGT |

ACCN: ORF Size: NM\_000392 4635 bp

|                       | 2 (ABCC2) (NM_000392) Human Tagged Lenti ORF Clone – RC218976L4  |
|-----------------------|--|
| OTI Disclaimer:       | Due to the inherent nature of this plasmid, standard methods to replicate additional amounts<br>of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore,<br>OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts<br>of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a<br>reduced cost. Please contact our customer care team at <u>custsupport@origene.com</u> or by<br>calling 301.340.3188 option 3 for pricing and delivery. |
|                       | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>  |
| OTI Annotation:       | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.   |
| Components:           | The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).   |
| Reconstitution Method | <ol> <li>Centrifuge at 5,000xg for 5min.</li> <li>Carefully open the tube and add 100ul of sterile water to dissolve the DNA.</li> <li>Close the tube and incubate for 10 minutes at room temperature.</li> <li>Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.</li> <li>Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.</li> </ol>   |
| RefSeq:               | <u>NM 000392.1</u>   |
| RefSeq Size:          | 4868 bp  |
| RefSeq ORF:           | 4638 bp  |
| Locus ID:             | 1244   |
| UniProt ID:           | <u>Q92887</u>  |
| Cytogenetics:         | 10q24.2  |
| Domains:              | ABC_membrane, ABC_tran, AAA  |
| Protein Families:     | Druggable Genome, Transmembrane  |
| Protein Pathways:     | ABC transporters   |
| MW:                   | 174 kDa  |

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

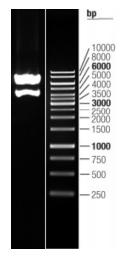

#### Scheme Content and Content and

Gene Summary:The protein encoded by this gene is a member of the superfamily of ATP-binding cassette<br/>(ABC) transporters. ABC proteins transport various molecules across extra- and intra-cellular<br/>membranes. ABC genes are divided into seven distinct subfamilies (ABC1, MDR/TAP, MRP,<br/>ALD, OABP, GCN20, White). This protein is a member of the MRP subfamily which is involved<br/>in multi-drug resistance. This protein is expressed in the canalicular (apical) part of the<br/>hepatocyte and functions in biliary transport. Substrates include anticancer drugs such as<br/>vinblastine; therefore, this protein appears to contribute to drug resistance in mammalian<br/>cells. Several different mutations in this gene have been observed in patients with Dubin-<br/>Johnson syndrome (DJS), an autosomal recessive disorder characterized by conjugated<br/>hyperbilirubinemia. [provided by RefSeq, Jul 2008]
