

Product datasheet for RC219076L2V

OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

SAMD9 (NM_017654) Human Tagged ORF Clone Lentiviral Particle

Product data:

Product Type: Lentiviral Particles

Product Name: SAMD9 (NM_017654) Human Tagged ORF Clone Lentiviral Particle

Symbol: SAMD9

Synonyms: C7orf5; DRIF1; M7MLS2; MIRAGE; NFTC; OEF1; OEF2

Mammalian Cell

Selection:

None

Vector: pLenti-C-mGFP (PS100071)

Tag: mGFP

ACCN: NM_017654 **ORF Size:** 4767 bp

ORF Nucleotide

Sequence:

The ORF insert of this clone is exactly the same as(RC219076).

OTI Disclaimer: Due to the inherent nature of this plasmid, standard methods to replicate additional amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements.

Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA.

Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence

verification at a reduced cost. Please contact our customer care team at

<u>custsupport@origene.com</u> or by calling 301.340.3188 option 3 for pricing and delivery.

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

RefSeq: NM 017654.3

RefSeq Size: 6855 bp RefSeq ORF: 4770 bp

SAMD9 (NM_017654) Human Tagged ORF Clone Lentiviral Particle - RC219076L2V

Locus ID: 54809

 UniProt ID:
 Q5K651

 Cytogenetics:
 7q21.2

 MW:
 184.3 kDa

Gene Summary: This gene encodes a sterile alpha motif domain-containing protein. The encoded protein

localizes to the cytoplasm and may play a role in regulating cell proliferation and apoptosis. Mutations in this gene are the cause of normophosphatemic familial tumoral calcinosis. Alternate splicing results in multiple transcript variants that encode the same protein.
