## CD166 (ALCAM) (NM 001627) Human Tagged ORF Clone Lentiviral Particle

**Product data:** 

**Product Type:** Lentiviral Particles

Product Name: CD166 (ALCAM) (NM 001627) Human Tagged ORF Clone Lentiviral Particle

Symbol: ALCAM

Synonyms: CD166; MEMD

Mammalian Cell

Selection:

None

**Vector:** pLenti-C-mGFP (PS100071)

Tag: mGFP

**ACCN:** NM\_001627 **ORF Size:** 1749 bp

**ORF Nucleotide** 

The ORF insert of this clone is exactly the same as(RC219251).

OTI Disclaimer:

Sequence:

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**RefSeg:** NM 001627.2

RefSeq Size:4923 bpRefSeq ORF:1752 bp

Locus ID: 214

UniProt ID: Q13740

Cytogenetics: 3q13.11

**Domains:** ig

**Protein Families:** Druggable Genome, ES Cell Differentiation/IPS, Transmembrane

## CD166 (ALCAM) (NM\_001627) Human Tagged ORF Clone Lentiviral Particle - RC219251L2V

**Protein Pathways:** Cell adhesion molecules (CAMs)

**MW:** 65.6 kDa

Gene Summary: This gene encodes activated leukocyte cell adhesion molecule (ALCAM), also known as CD166

(cluster of differentiation 166), which is a member of a subfamily of immunoglobulin

receptors with five immunoglobulin-like domains (VVC2C2C2) in the extracellular domain. This protein binds to T-cell differentiation antigene CD6, and is implicated in the processes of cell adhesion and migration. Multiple alternatively spliced transcript variants encoding different

isoforms have been found. [provided by RefSeq, Aug 2011]
