

# Product datasheet for RC219688L1

# WNT11 (NM\_004626) Human Tagged Lenti ORF Clone

NM\_004626

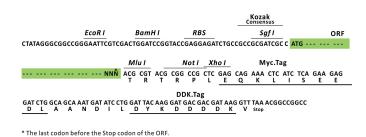

1062 bp

# **Product data:**

#### OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

Product Type:	Expression Plasmids
Product Name:	WNT11 (NM_004626) Human Tagged Lenti ORF Clone
Tag:	Myc-DDK
Symbol:	WNT11
Synonyms:	HWNT11
Mammalian Cell Selection:	None
Vector:	pLenti-C-Myc-DDK (PS100064)
E. coli Selection:	Chloramphenicol (34 ug/mL)
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(RC219688).
<b>Restriction Sites:</b>	Sgfl-Mlul
Cloning Scheme:	
	Cloning sites used for ORF Shuttling: Sgf 1 ORF Mlu 1 GCG ATC GC ATG NNN ACG CGT

ACCN: ORF Size:

	1 (NM_004626) Human Tagged Lenti ORF Clone – RC219688L1
OTI Disclaimer:	Due to the inherent nature of this plasmid, standard methods to replicate additional amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a reduced cost. Please contact our customer care team at <u>custsupport@origene.com</u> or by calling 301.340.3188 option 3 for pricing and delivery.
	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Method:	<ol> <li>Centrifuge at 5,000xg for 5min.</li> <li>Carefully open the tube and add 100ul of sterile water to dissolve the DNA.</li> <li>Close the tube and incubate for 10 minutes at room temperature.</li> <li>Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.</li> <li>Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.</li> </ol>
RefSeq:	<u>NM 004626.2</u>
RefSeq Size:	1927 bp
RefSeq ORF:	1065 bp
Locus ID:	7481
UniProt ID:	<u>096014</u>
Cytogenetics:	11q13.5
Protein Families:	Secreted Protein, Transmembrane
Protein Pathways:	Basal cell carcinoma, Hedgehog signaling pathway, Melanogenesis, Pathways in cancer, Wnt signaling pathway
MW:	39.18 kDa

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

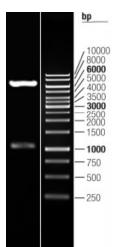

## Service Weight Wight and Strain Strai

# Gene Summary:The WNT gene family consists of structurally related genes which encode secreted signaling<br/>proteins. These proteins have been implicated in oncogenesis and in several developmental<br/>processes, including regulation of cell fate and patterning during embryogenesis. This gene is<br/>a member of the WNT gene family. It encodes a protein which shows 97%, 85%, and 63%<br/>amino acid identity with mouse, chicken, and Xenopus Wnt11 protein, respectively. This gene<br/>may play roles in the development of skeleton, kidney and lung, and is considered to be a<br/>plausible candidate gene for High Bone Mass Syndrome. [provided by RefSeq, Jul 2008]
