

Product datasheet for RC219806L1

POLK (NM_016218) Human Tagged Lenti ORF Clone

Product data:

Product Type: Expression Plasmids

Product Name: POLK (NM 016218) Human Tagged Lenti ORF Clone

Tag: Myc-DDK

Symbol: POLK

Synonyms: DINB1; DINP; POLQ

Mammalian Cell None

Selection:

Vector:pLenti-C-Myc-DDK (PS100064)E. coli Selection:Chloramphenicol (34 ug/mL)

ORF Nucleotide The ORF insert of this clone is exactly the same as(RC219806).

Sequence:

Restriction Sites: Sgfl-Mlul

Cloning Scheme:

^{*} The last codon before the Stop codon of the ORF.

ACCN: NM_016218

ORF Size: 2610 bp

OriGene Technologies, Inc. 9620 Medical Center Drive, Ste 200

POLK (NM_016218) Human Tagged Lenti ORF Clone - RC219806L1

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method: 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: <u>NM 016218.1</u>

 RefSeq Size:
 4074 bp

 RefSeq ORF:
 2613 bp

 Locus ID:
 51426

 UniProt ID:
 Q9UBT6

 Cytogenetics:
 5q13.3

Domains: IMS, ZnF Rad18

Protein Families: Druggable Genome

MW: 98.6 kDa

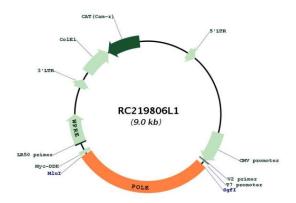

Gene Summary: This gene encodes a member of the DNA polymerase type-Y family of proteins. The encoded

protein is a specialized DNA polymerase that catalyzes translesion DNA synthesis, which allows DNA replication in the presence of DNA lesions. Human cell lines lacking a functional copy of this gene exhibit impaired genome integrity and enhanced susceptibility to oxidative damage. Mutations in this gene that impair enzyme activity may be associated with prostate

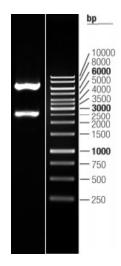

cancer in human patients. [provided by RefSeq, Sep 2016]
