

# Product datasheet for RC219949L2

## LILRB1 (NM\_006669) Human Tagged Lenti ORF Clone

### **Product data:**

#### OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

Product Type:	Expression Plasmids
Product Name:	LILRB1 (NM_006669) Human Tagged Lenti ORF Clone
Tag:	mGFP
Symbol:	LILRB1
Synonyms:	CD85J; ILT-2; ILT2; LIR-1; LIR1; MIR-7; MIR7; PIR-B; PIRB
Mammalian Cell Selection:	None
Vector:	pLenti-C-mGFP (PS100071)
E. coli Selection:	Chloramphenicol (34 ug/mL)
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(RC219949).
<b>Restriction Sites:</b>	Sgfl-Mlul
Cloning Scheme:	
	Cloning sites used for ORF Shuttling:
	Sgf I         ORF         Mlu I            GCG ATC GC         ATG // NNN         ACG CGT

ACCN: ORF Size: NM\_006669 1950 bp

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

	ILRB1 (NM_006669) Human Tagged Lenti ORF Clone – RC219949L2
OTI Disclaimer:	Due to the inherent nature of this plasmid, standard methods to replicate additional amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a reduced cost. Please contact our customer care team at <u>custsupport@origene.com</u> or by calling 301.340.3188 option 3 for pricing and delivery.
	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Met	<ul> <li>centrifuge at 5,000xg for 5min.</li> <li>Carefully open the tube and add 100ul of sterile water to dissolve the DNA.</li> <li>Close the tube and incubate for 10 minutes at room temperature.</li> <li>Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.</li> <li>Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.</li> </ul>
RefSeq:	<u>NM 006669.2, NP 006660.1</u>
RefSeq Size:	3229 bp
RefSeq ORF:	1953 bp
Locus ID:	10859
UniProt ID:	<u>Q8NHL6</u>
Cytogenetics:	19q13.42
Domains:	ig, IGc2, IG
Protein Families:	Transmembrane
MW:	70.8 kDa

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US 

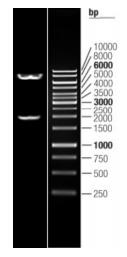

#### Serigene LILRB1 (NM\_006669) Human Tagged Lenti ORF Clone – RC219949L2

Gene Summary:This gene is a member of the leukocyte immunoglobulin-like receptor (LIR) family, which is<br/>found in a gene cluster at chromosomal region 19q13.4. The encoded protein belongs to the<br/>subfamily B class of LIR receptors which contain two or four extracellular immunoglobulin<br/>domains, a transmembrane domain, and two to four cytoplasmic immunoreceptor tyrosine-<br/>based inhibitory motifs (ITIMs). The receptor is expressed on immune cells where it binds to<br/>MHC class I molecules on antigen-presenting cells and transduces a negative signal that<br/>inhibits stimulation of an immune response. It is thought to control inflammatory responses<br/>and cytotoxicity to help focus the immune response and limit autoreactivity. Multiple<br/>transcript variants encoding different isoforms have been found for this gene. [provided by<br/>RefSeq, Jul 2008]
