

Product datasheet for RC220072L2V

OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

CD82 (NM_001024844) Human Tagged ORF Clone Lentiviral Particle

Product data:

Product Type: Lentiviral Particles

Product Name: CD82 (NM_001024844) Human Tagged ORF Clone Lentiviral Particle

Symbol: CD82

Synonyms: 4F9; C33; GR15; IA4; KAI1; R2; SAR2; ST6; TSPAN27

Mammalian Cell

Selection:

None

Vector: pLenti-C-mGFP (PS100071)

Tag: mGFP

ACCN: NM_001024844

ORF Size: 726 bp

ORF Nucleotide

The ORF insert of this clone is exactly the same as(RC220072).

Sequence:

Cytogenetics:

OTI Disclaimer:

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

RefSeq: NM 001024844.1, NP 001020015.1

 RefSeq Size:
 1640 bp

 RefSeq ORF:
 729 bp

 Locus ID:
 3732

 UniProt ID:
 P27701

Protein Families: Druggable Genome, Transmembrane

11p11.2

Protein Pathways: p53 signaling pathway

ORIGENE

MW: 26.6 kDa

Gene Summary: This metastasis suppressor gene product is a membrane glycoprotein that is a member of

the transmembrane 4 superfamily. Expression of this gene has been shown to be

downregulated in tumor progression of human cancers and can be activated by p53 through a consensus binding sequence in the promoter. Its expression and that of p53 are strongly correlated, and the loss of expression of these two proteins is associated with poor survival for prostate cancer patients. Two alternatively spliced transcript variants encoding distinct

isoforms have been found for this gene. [provided by RefSeq, Jul 2008]
