OTI Disclaimer:	Due to the inherent nature of this plasmid, standard methods to replicate additional am of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore OriGene does not guarantee the capability to replicate this plasmid DNA. Additional am of DNA can be purchased from OriGene with batch-specific, full-sequence verification at reduced cost. 	The molecular sequence of this clone aligns with the gene accession number as a point reference only. However, individual transcript sequences of the same gene can differ th naturally occurring variations (e.g. polymorphisms), each with its own valid existence. The clone is substantially in agreement with the reference, but a complete review of all prev variants is recommended prior to use. <u>More info</u>	rough his
